## General Information

---

### 1.1 General Information

Thank you for purchasing Bakefairy! We're very pleased that you have chosen our theme to use on your website. We're doing our best not to disappoint you! Before you get started, please check out these documentation pages. Bakefairy can only be used with WordPress and we assume that you already have it installed and ready to go. If you don't, please see [WordPress Codex](#) to get started.

### 1.2 Requirements

Before using Bakefairy, please meet the following requirements:

- Essentials to run WordPress – Read more about [WordPress Minimum Requirements](#) – in case any doubts regarding the server, contact your host provider.
- Latest version of WordPress, which you can [download here](#).
- Create secure [FTP](#) and Database.

### 1.3 Installation

In our guide, we will show you step by step instructions on how to install our WordPress theme for beginners. Below you will find two ways to install a WordPress theme.

#### 1.3.1 Installation via Administration Panel

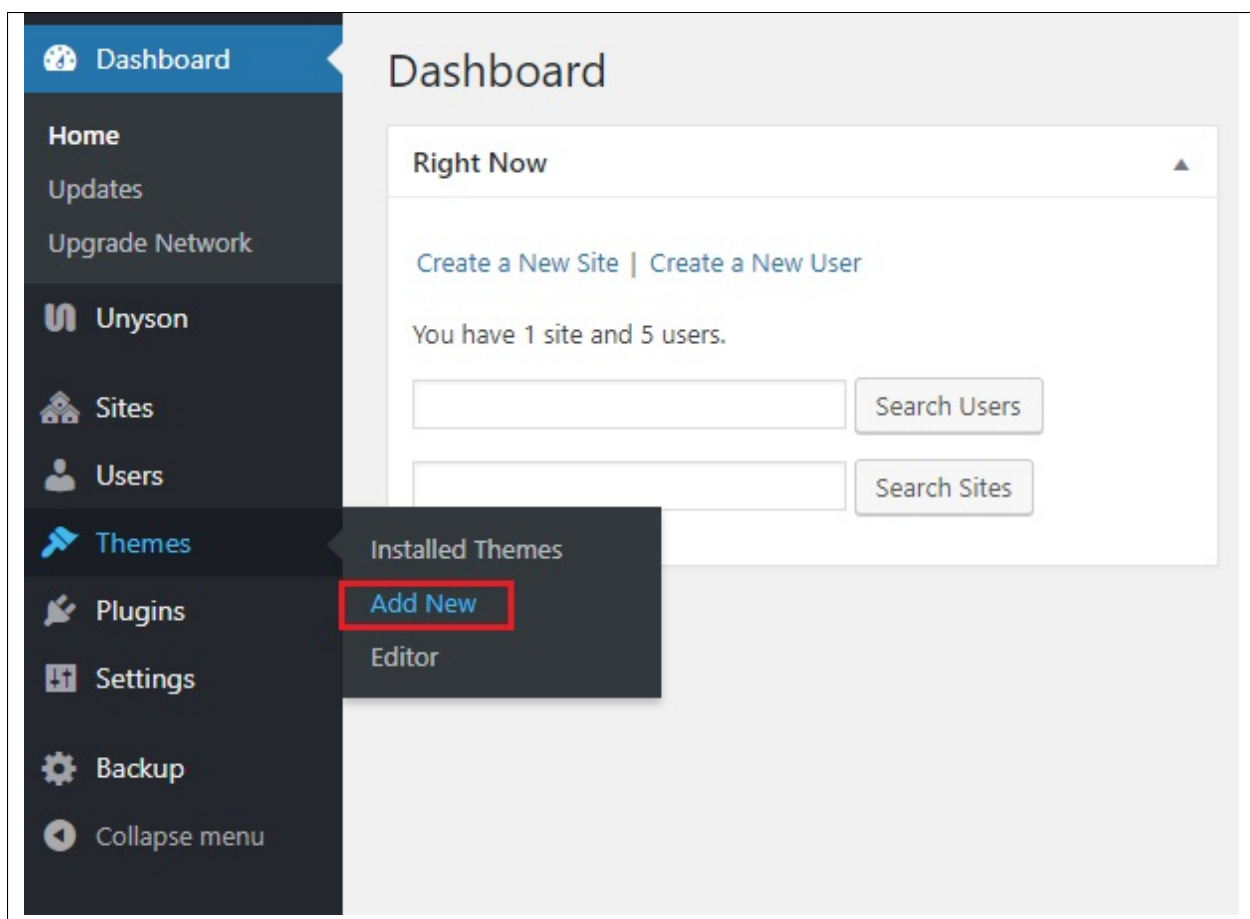

If Bakefairy files are downloaded from your Themeforest account, you can start an installation using WordPress administration panel.

Follow steps below to install the theme:

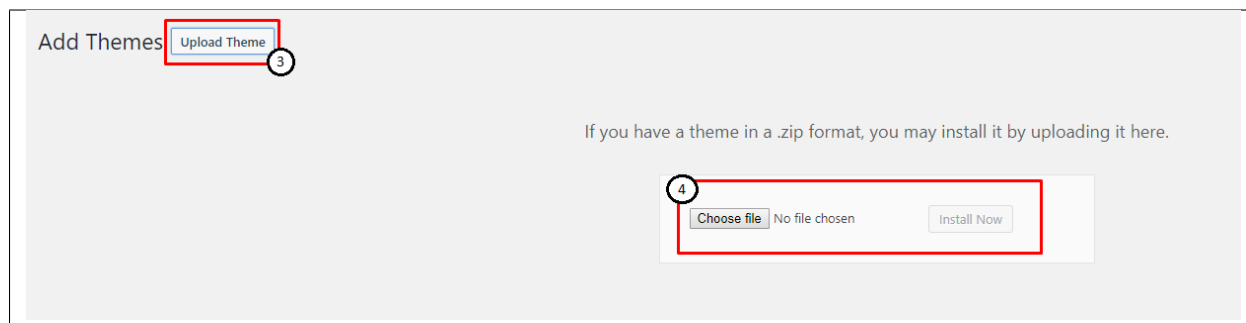

- **Step 1** - Once you've logged in to your administration panel, go to *My Sites > Network Admin*.

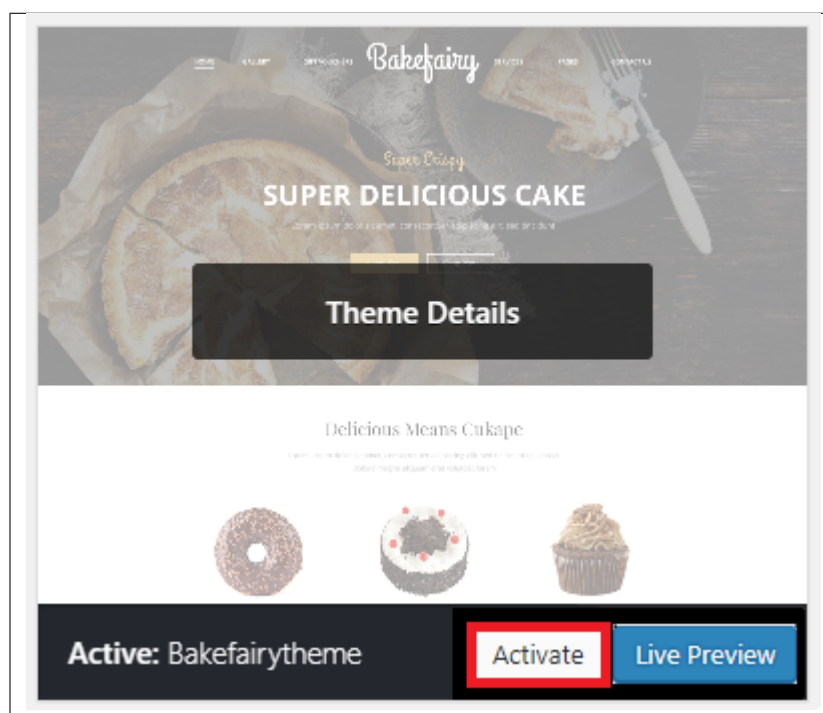

- **Step 2** - Then click on *Themes > Add New*, you will be directed to a page where you can choose available themes.

- **Step 3** - Once directed to the page, on the upper left side of the screen click on *Upload Theme* button.
- **Step 4** - Choose the *Bakefairytheme.zip* file from your computer, then click *Install Now*.

- **Step 5** - Click on *My Sites* then go to *Appearance > Themes* and *Activate Bakefairy*.

- **Step 6** - After activating *Bakefairy*, you will be sent to *Theme Installation Instruction* steps. By following this steps you will be asked to install required plugins, activate them, and import demo content (required).

### Theme installation instructions

Please follow these steps:

1. Install all required plugins, click here: [install plugins](#)
2. Activate all required plugins, click here: [activate plugins](#)
3. Import demo content, click here: (click only when the theme plugin is active)

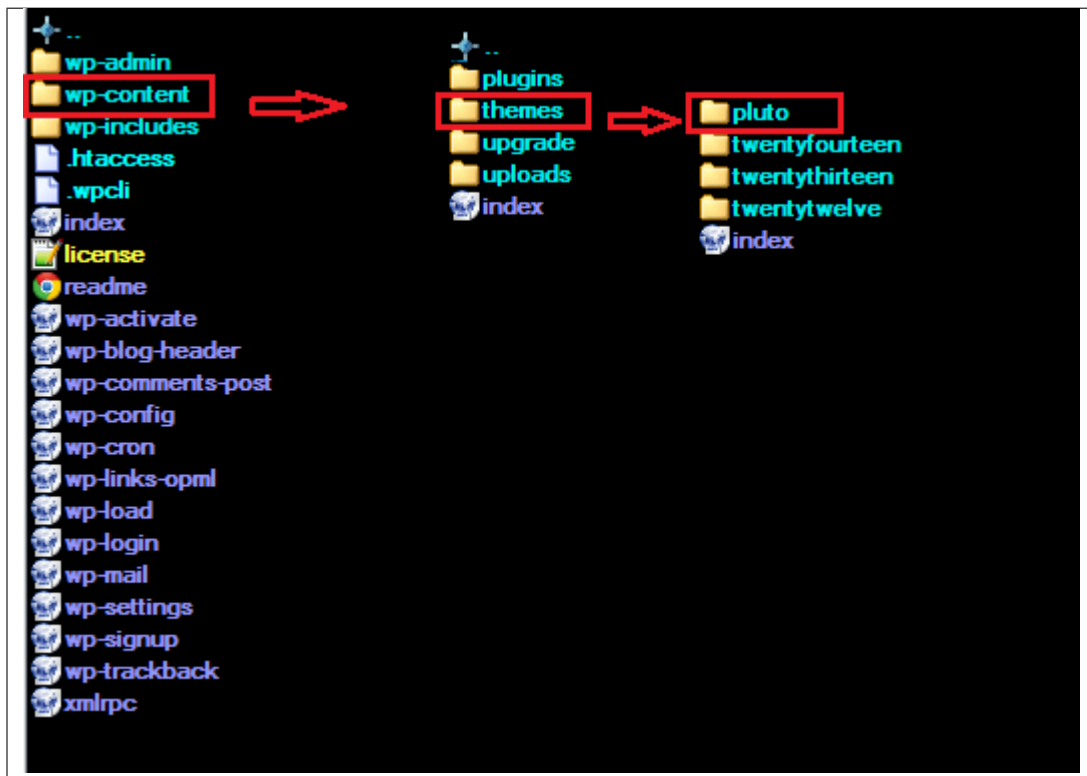

### Common Install Error: Are You Sure You Want To Do This?

If you get the following question message when installing *Bakefairytheme.zip* file via WordPress, it means that you have an upload file size limit. *Install the theme via FTP* or call your hosting company and ask them to increase the limit.

### 1.3.2 Installation via FTP

To install Bakefairy WP via FTP, follow steps below:

- **Step 1** – Unarchive *Bakefairytheme.zip* file
- **Step 2** – Access your host web server using FTP client
- **Step 3** – Find directory *wp-content* > *themes*
- **Step 4** – Put folder *Bakefairytheme* in directory *wp-content* > *themes*

- **Step 5** - Go to your WordPress administration panel, navigate to *Appearance > Themes* then activate **Bakefairytheme**.

#### Learn more:

- [WordPress Codex – FTP clients](#)

## 1.4 Unyson, Extension, and Plugins

Some functionalities of the Bakefairy Theme are available because of the plugins we used to create it. Once Bakefairy is activated in your WordPress admin panel you should see notification about bundled plugins we recommend to install – they are included in Bakefairy package – so you don't have to do anything more than click *install* and *activate*.

### 1.4.1 Unyson

**Unyson** is a framework for [WordPress](#) that facilitates development of a theme. This framework was created from the ground up by the team behind [ThemeFuse](#) from the desire to empower developers to build outstanding WordPress themes fast and easy. This documentation is heavily modified by [createIT](#) to ensure all custom extensions are well documented.

**This documentation assumes you have a working knowledge of WordPress. If you haven't, please start by reading [WordPress Documentation](#).**

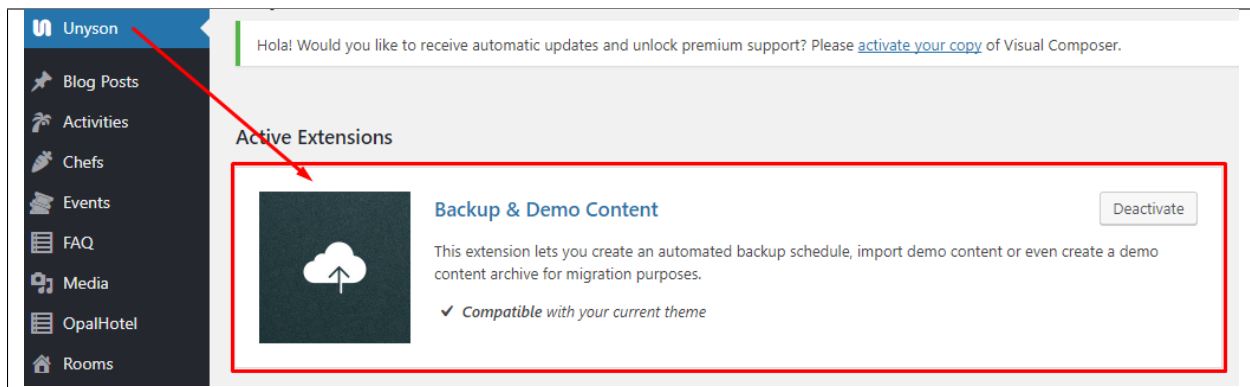

#### Minimum Requirements

- WordPress 4.4 or greater
- PHP version 5.2.4 or greater
- MySQL version 5.0 or greater

#### Installation

Unyson is part of *Bakefairy plugin* that should be activated to be able to use the fully use this theme.

After plugin will be activated you will notice the Unyson entry in the sidebar:

**Configure the plugin by going to the Unyson menu and activating the following extensions:**

- Backup & Demo Content: This extension lets you create an automated backup schedule, import demo content or even create a demo content archive for migration purposes.
- SASS Compiler: Compiles SASS files. Remember to activate it when you are going to change theme colors via Customize.
- Breadcrumbs: Creates a simplified navigation menu for the pages that can be placed anywhere in the theme. This will make navigating the website much easier.
- Visual Composer: Allows for seamless integration with Visual Composer
- Bakefairy Team: This extension will add team post type support
- Bakefairy Menu: This extension will add menu post type support.
- Bakefairy Package: This extension will add packages post type support.
- CT Testimonials: This extension will add testimonials post type support.
- CT Footer: This extension will add footer sidebars and options.
- Bakefairy Portfolio: This extension will add portfolio post type support.

### License

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software. Unyson inherits the [General Public License](#) (GPL) from WordPress.

## 1.4.2 Extension

On the Unyson page you'll see a list of available extensions separated in two sections:

**Active Extensions** - Extensions that *should be activate* to be able to fully use Bakefairy WP theme functionality:

**Available Extensions** - Extensions not yet downloaded or activate.

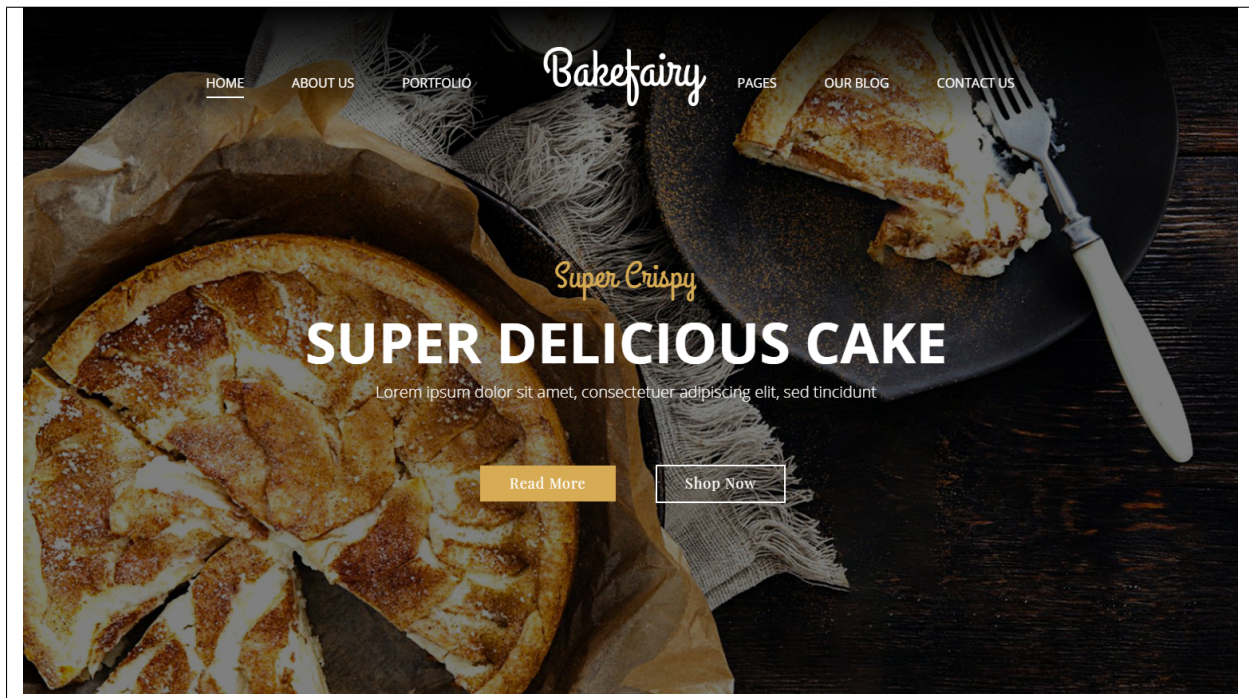

---

**Note:** We recommend to not activate any of the extensions that are not part of the list above. They may not be compatible with the theme and could create unexpected issues.

---

### 1.4.3 Plugins

#### Slider Revolution

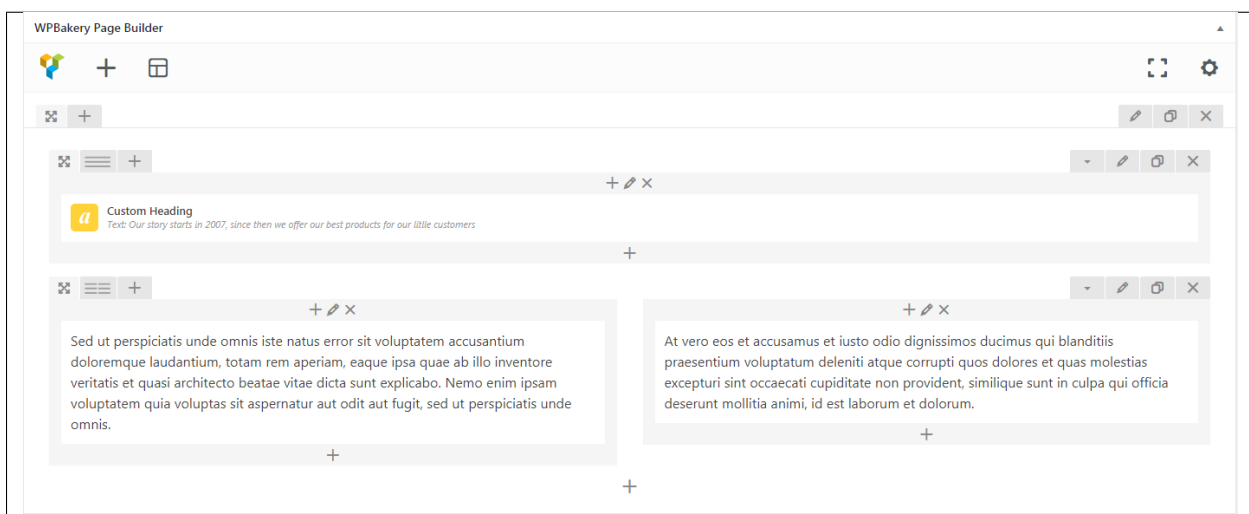

#### How to activate the plugin

Slider Revolution is included in Religia WP package – so you don't have to do anything more than click *install* and *activate* as you do with other plugins.

If you are new user of the revolution Slider plugin or you just want to check some of it functionality feel free to check [Slider Revolution Documentation](#) created by the authors of this plugin.

#### Visual Composer

Simply drag and drop elements to build your page content. We prepared components which will help you determine main structure of the webpage – easily set up backgrounds, colors and styles for whole sections as well as lots of various smaller components which you can freely put wherever you want.

---

**Note:** As the VC plugin used with Bakefairy WP Theme is part of a bundle, that mean that theme author has a license and only he/she can download latest versions of VC and include it in the theme. You as a theme user may use Visual Composer free of charge while you use the theme that came with VC (because you have a license for that theme).

---

### Learn more:

For more information about Visual Composer, please check articles below:

- [How to install Visual Composer](#)
- [Visual Composer demo](#)
- [Visual Composer documentation](#)

### Contact Form 7

Contact forms in Bakefairy WP are created with the use of *Contact Form 7 Plugin*. Below you will find information how to recreate Contact forms used in our theme by adding the correct markup for the Form section of this plugin.

Send us a Message

Copy this shortcode and paste it into your post, page, or text widget content:

```
[contact-form-7 id="330" title="Send us a Message"]
```

Form

Mail ! Messages Additional Settings

Form

text email URL tel number date text area drop-down menu checkboxes radio buttons acceptance quiz
reCAPTCHA file submit

```

<div class="ct-contact-form">
<h3 class="ct-formTitle ct-contactPage"> SEND US A MESSAGE </h3>
<label> Name
  [text* your-name placeholder "Name"] </label>

<label> Email
  [email* your-email placeholder "Email"] </label>

<label> Phone
  [text phone placeholder "Phone"] </label>

<label> Message
  [textarea your-message placeholder "Message"] </label>

[submit "Send Message"]

</div>

```

If you never before used this plugin I suggest you to check [Getting Started with ContactForm 7](#).

## MailChimp for Wordpress

MailChimp for Wordpress helps you add more subscribers to your MailChimp lists using various methods. You can create good looking opt-in forms or integrate with any other form on your site, like your comment, contact or checkout form.

1.4. Unyson, Extension, and Plugins

## Instagram Feed

Display Instagram photos from any non-private Instagram accounts, either in the same single feed or in multiple different ones. Add beautifully clean, customizable, and responsive Instagram feeds to your website. Super simple to set up and tons of customization options to seamlessly match the look and feel of your site.

If you never before used this plugin I suggest you to check [Overview](#)

## 1.5 Demo Content

**Note:** To be able to use theme content installation and backup functionality make sure to activate *Backup & Demo Content* Unyson's extension.

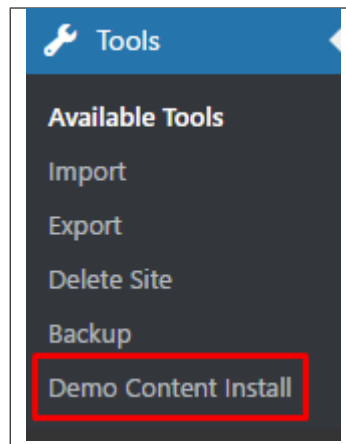

The fastest and easiest way to import our demo content is to use Theme Options *Demo Content Installer*. It will import all pages and posts, sample slider, widgets, theme options, assigned pages, and more.

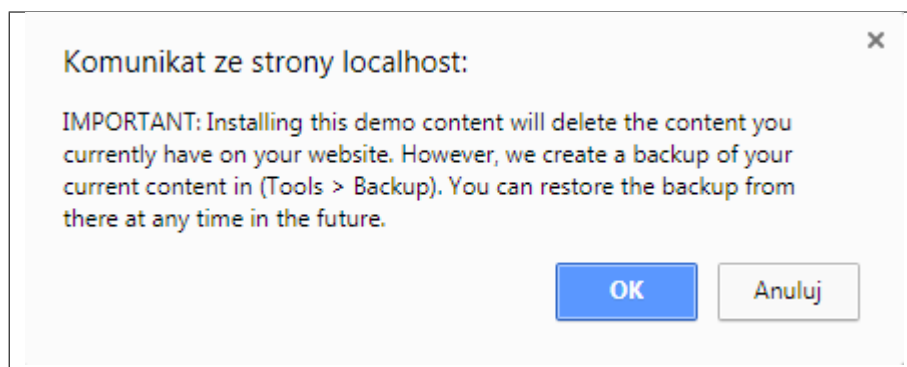

### 1.5.1 Import Demo Content

To import our demo content, please follow the steps below:

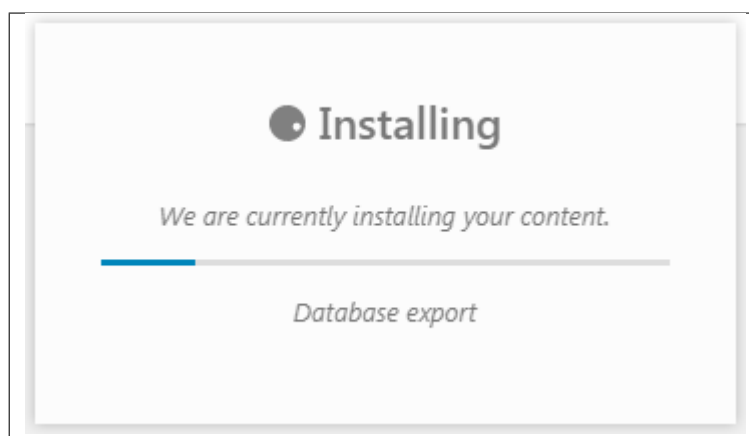

- **Step 1** – Navigate to Tools where after activating the Unyson extension *Demo Content Install* option will be available

- **Step 2** – Choose import option you want to use from available options
- **Step 3** - To be able to continue you need to agree to this term.

- **Step 4** – Wait until the content will be installed

*Importing can take a few minutes. Please be patient and wait for it to complete. Once it is loading, you will see message with indicating progress.*

We recommend this approach on a newly installed WordPress. It will *replace* the content you currently have on your website. However, we create a backup of your current content in (Tools > Backup). You can restore the backup from there at any time in the future.

## 1.6 Support

All of our items comes with free support. Free support is limited to questions regarding the themes features or problems. We provide premium support for code customisation or third-party plugins.

---

**Note:** Our support hours: **10:00 AM – 6:00 PM UTC +1 on Monday to Friday.**

---

### 1.6.1 Free Support

For issues and concerns, you can reach us through these support methods:

- **E-mail** – [support@createit.pl](mailto:support@createit.pl)
- **Help Desk** – Click [here](#) to go to our support website. Just click on the *Submit Ticket* button and follow instructions to create a ticket.
- **Forum** – Comment/Post on the product you have issues/queries in [ThemeForest](#) or [CodeCanyon](#) websites.

#### **Before You Post in a Forum**

We urge you to follow the steps below, before you post a new topic on the forum, to speed up your request. It's in everyone's interest and will benefit in making the entire forum more efficient:

- **Step 1** – Always check the Documentation and the Knowledgebase Section. Most questions are already answered in those areas.
- **Step 2** – If your question hasn't been brought up on the forum, please post a new topic. Always be as specific as possible. Creating a topic requires entering the live URL to your home page or page that shows the issue in question. It also has bars for WP and FTP login info, which aren't required, however, providing us with your login information can save a lot of time for both of us. Login credentials are securely stored and accessible only by our support staff.
- **Step 3** – We usually answer questions in 24 hours on working days. However, if you don't get any answer within 72 hours bump up your question or send us an e-mail.

For *all support methods*, you will receive confirmations and replies on your queries through e-mail or by tracking your ticket which you will also get through e-mail. To track your ticket, please [click here](#).

Once we reply to your query, *each ticket will be open for 7 days* without a reply from you. On the 6th day without a reply, an e-mail will be sent to notify you of the ticket's inactivity. To make the ticket active again, you simply need to reply or follow the steps in the e-mail. If you won't make the ticket active within 7 days, on the 8th day the ticket will automatically be closed.

### 1.6.2 Premium Support

We can create your website from scratch, redesign it or just extend the current ones. For more information, please take a look at [our website](#). Typical issues covered by Premium Support:

- Custom CSS
- Support for third party software and plug-ins
- WordPress Installation with Theme configuration
- Server configuration
- Site structure modifications

- Graphic adjustments, etc.
- WordPress general howto's

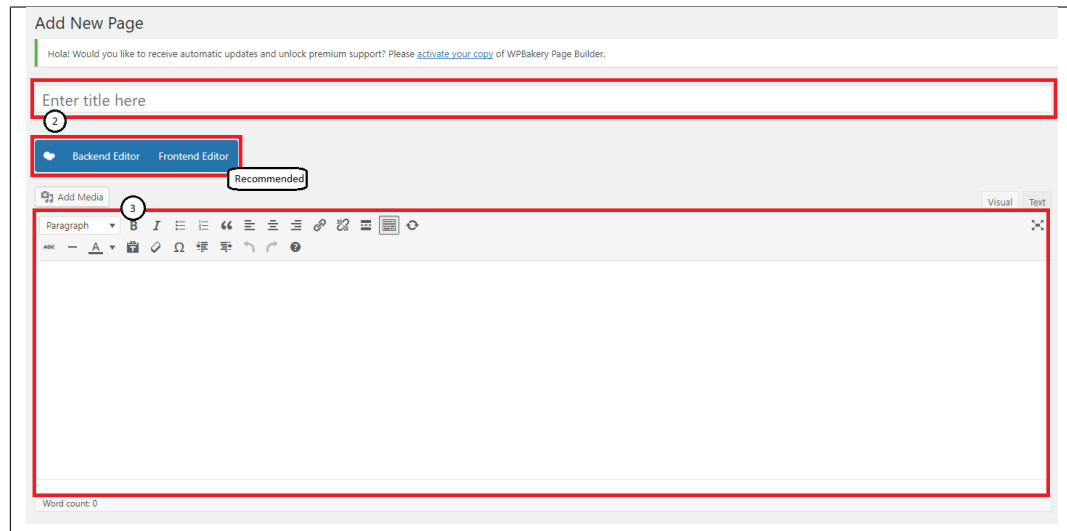

## 2.1 Create New Page

To create a new *Page* in *Bakefairy* follow the steps below:

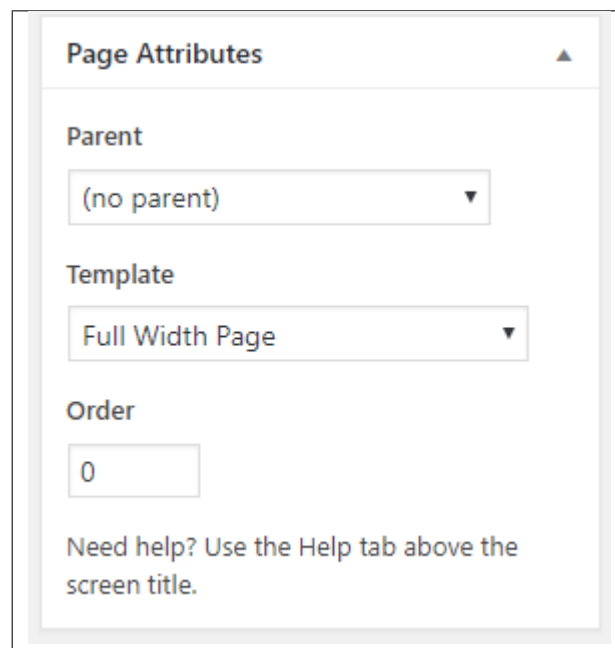

- **Step 1** - In *Dashboard*, navigate to *Pages > Add New*. You will be directed to a page where you can add details on the page.

- **Step 2** - Add the *Title* of the page.
- **Step 3** - Add content – we recommend you to create page content using *Visual Composer* or by modifying demo content.

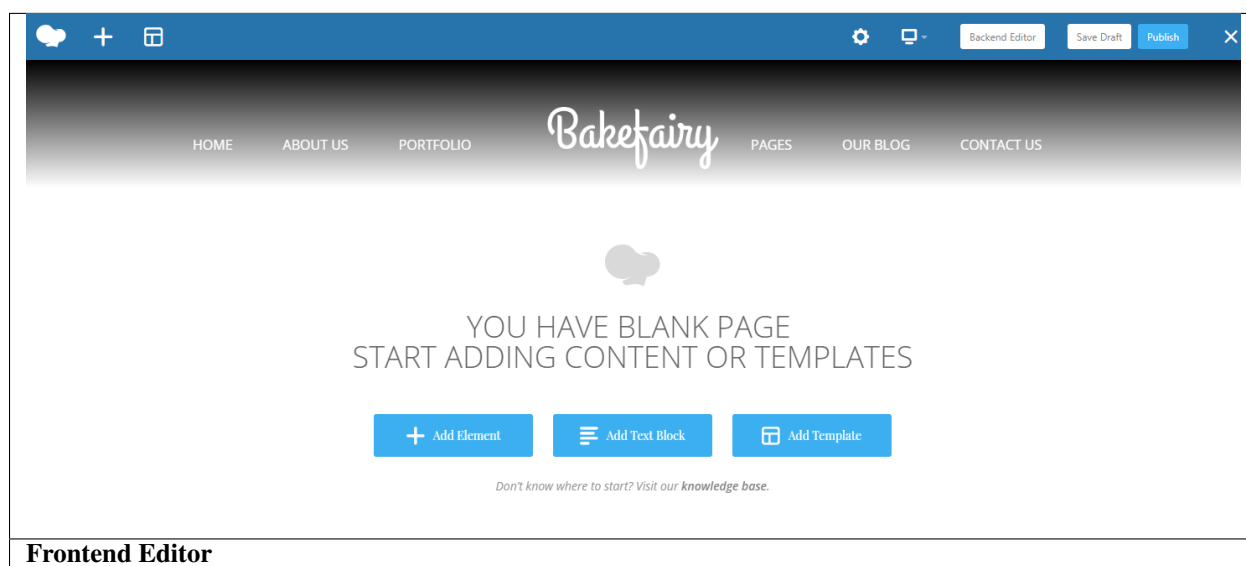

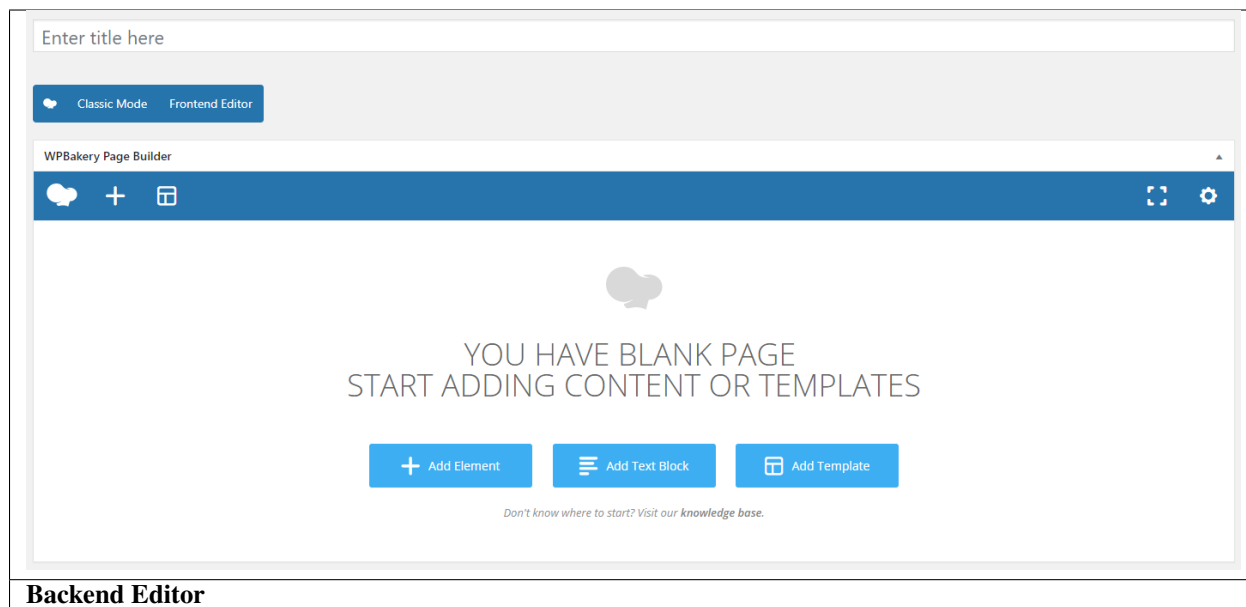

- **Step 4** - Choose page attributes. To have the same look as the demo, at the Template section of the page attribute, use Full Width Page. This is a template set for Bakefairy.

- Parent – If you want to create this page as a subpage.
- Template – You can choose one of defined page templates
- Order – The order of the page.
- **Step 5** - After adding all the contents of the page, click on the *Publish* button.

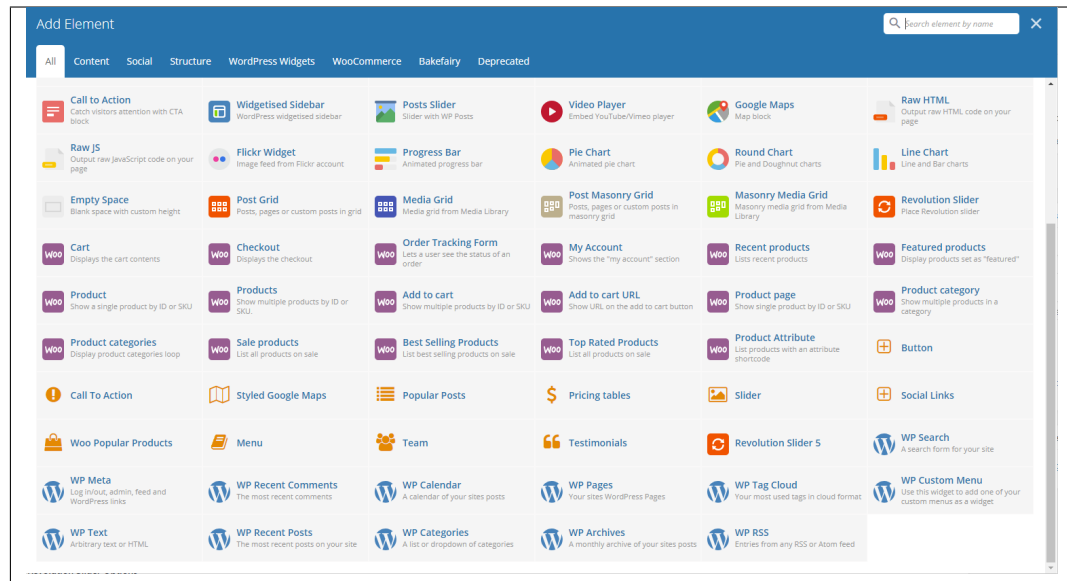

### 2.1.1 Create Page Using Visual Composer

When using *Visual Composer* to add content, you have 2 Editor options, the **Backend Editor** and **Frontend Editor**.

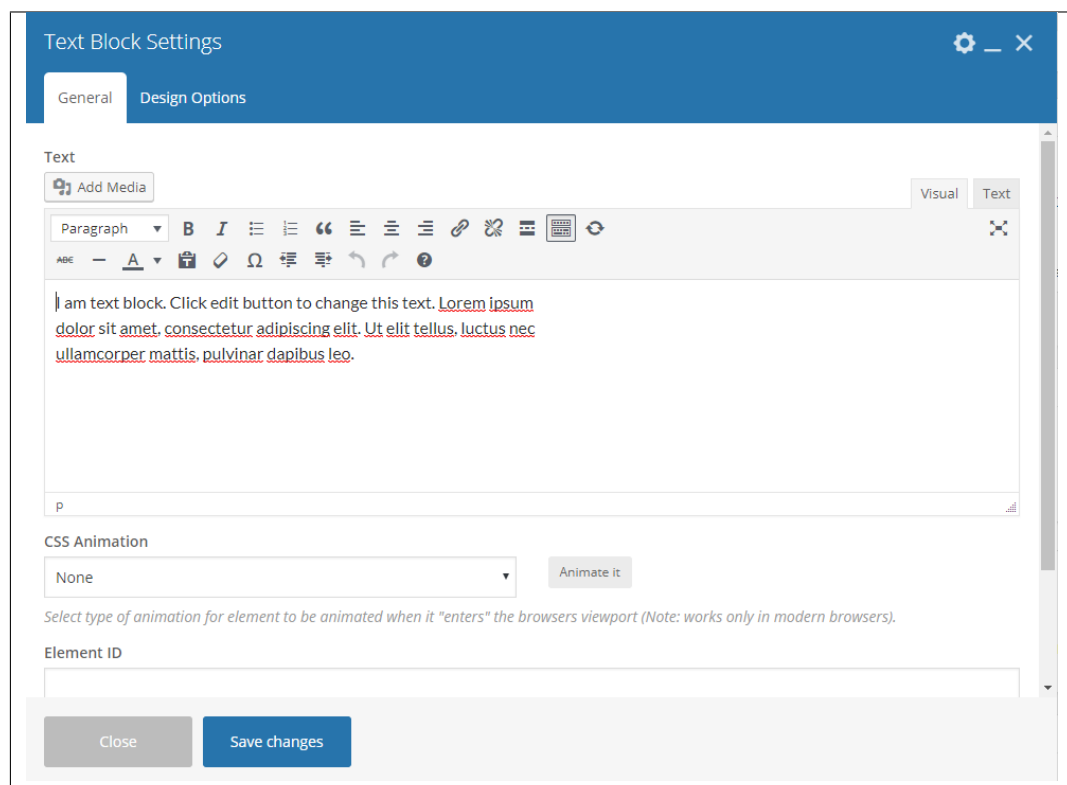

In adding contents to the page, there are many options to choose from. Some of the options are:

- **Elements** - You will be able to choose elements that are needed and used on the page.

- **Text Block** – This is where you add Text to the page.

- **Row** – An area where you can add elements.

## 2.2 Homepage Setup

If you have added some pages via *Pages > Add New* you can choose one and set it up as a homepage.

Use Static front page tool in *Settings > Reading* and choose from the list your homepage. Remember to click *Save* changes at the end of editing.

## Reading Settings

### 3.1.10 Team

The screenshot shows the 'Add Element' sidebar in WordPress. The 'Bakefairy' tab is selected. The 'Team' widget is highlighted with a red box. The sidebar contains various widgets categorized by type, including content, social, structure, WordPress widgets, WooCommerce, and deprecated elements. The 'Team' widget is located under the 'Bakefairy' category, between the 'Testimonials' and 'Revolution Slider 5' widgets.

This element will display the team members item in the page.

## Tips to be a Great Baker!

Many think baking is hard. I, for one, thought it was intimidating and challenging. But with practice and hardwork, I was able to improve my skills in baking.

These are some easy tips you can do to improve and be a great baker:

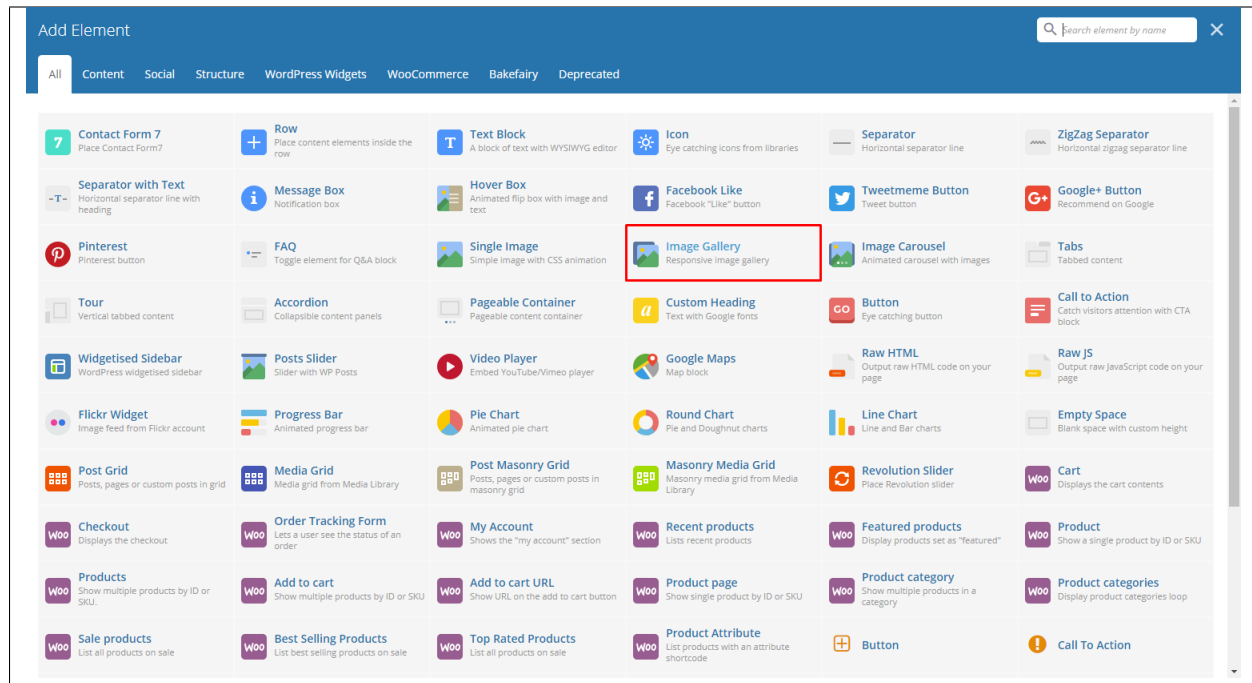

### **Organize your kitchen**

It might sound silly, but having an organized kitchen helps your productivity and will let you relax when baking. Being organized will help especially in measuring and mixing the ingredients.

**Follow the recipe's directions**

## Image Gallery

This element will let you add multiple images in your page.

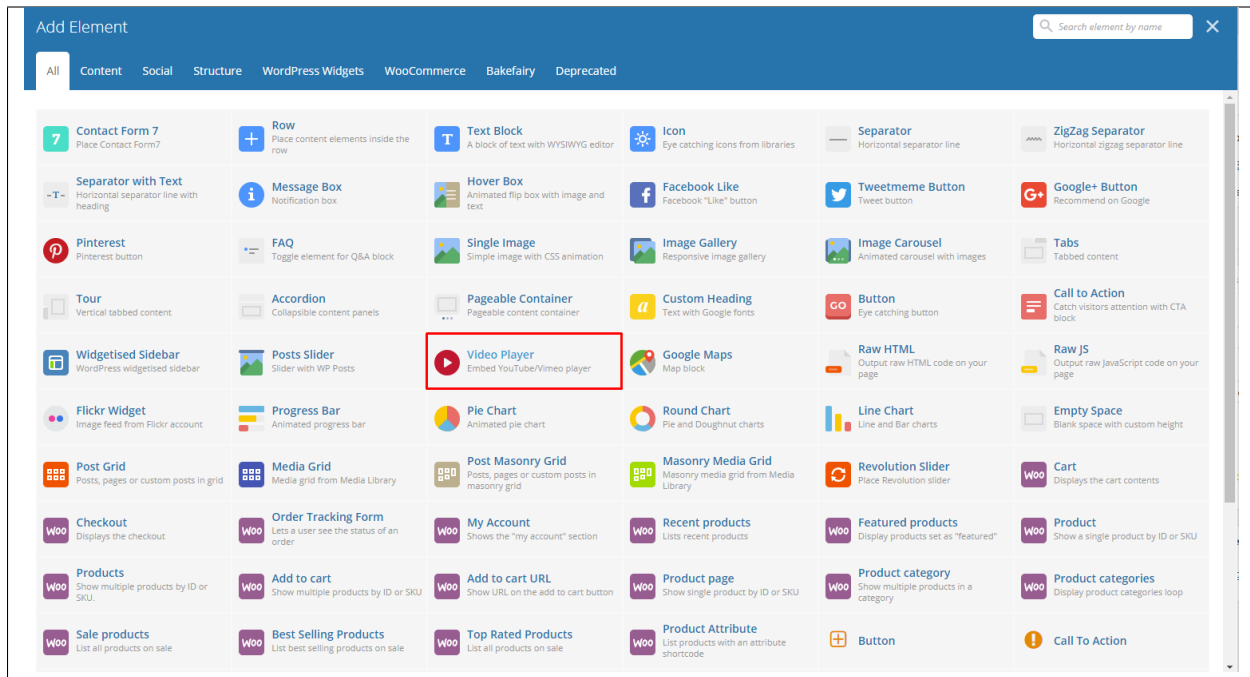

22 MAR, 2018

## Types of Cakes

## Video Player

This element will let you add a video or MP3 file inside your page by adding the link for the video/MP3.

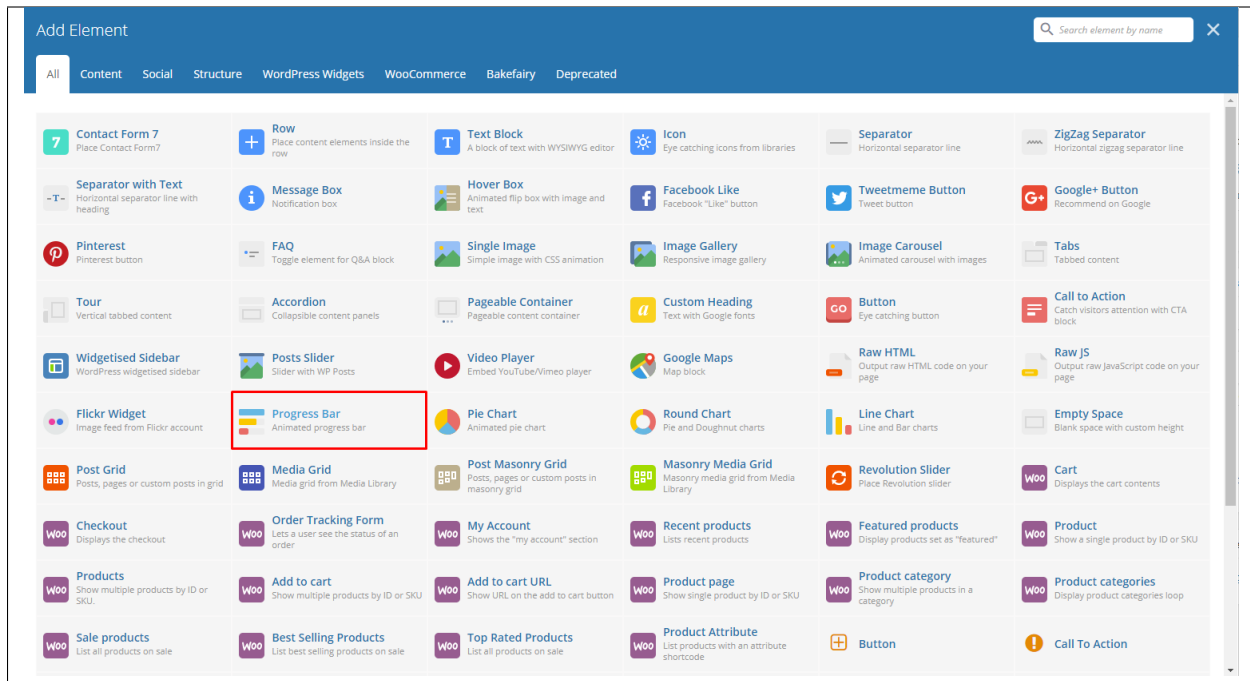

22 FEB, 2018

## Strawberry Swiss Roll

Strawberry filled Swiss Roll is a sweet but light desert that will not just impress kids but also

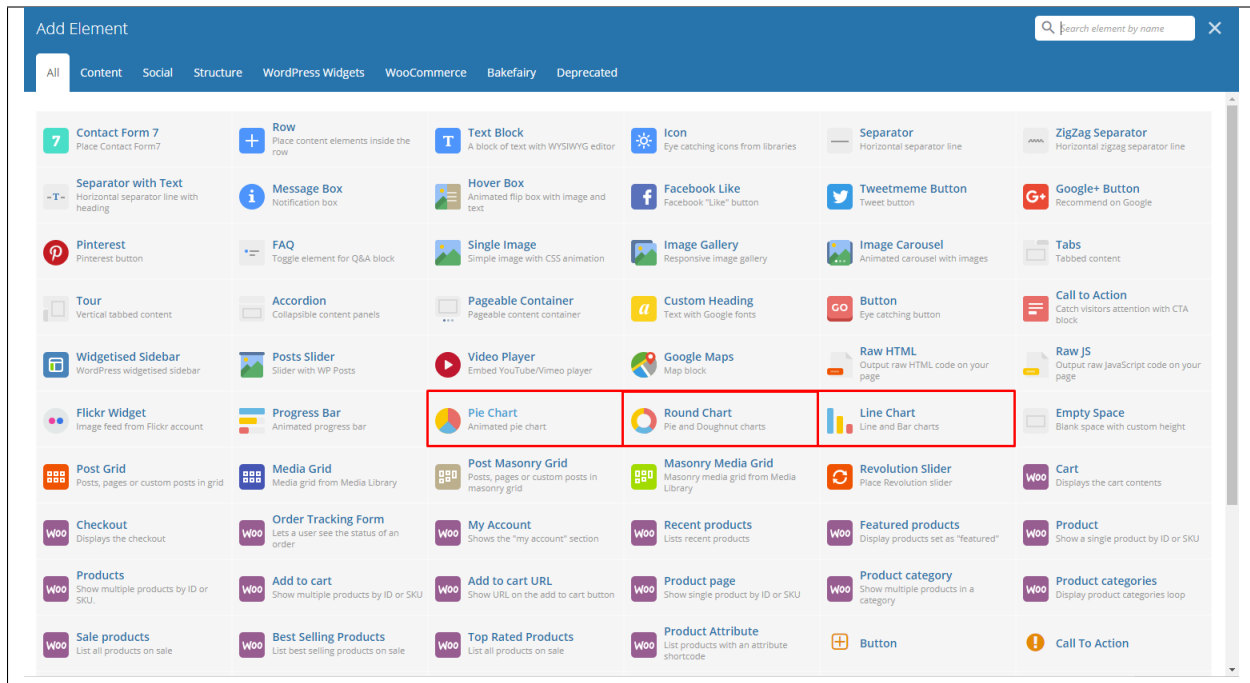

## Progress Bar

This element will add an animated progress bar in your page.

## Chart

This element lets you add a graph. These are the types of graph that you can add:

- **Pie**

- **Round**

- Line

---

### Blogs Posts

---

Bakefairy is loaded with options for the blog. It offers many different options for you to present your blog posts, along with several different blog post layouts. In addition, there are numerous theme options and shortcode options that allow you to customize how posts are displayed.

#### 4.1 Create New Blog Post

No matter which method you use to display your blog posts, first thing you need to do is create them.

*Bakefairy* offers several blog post formats:

Follow the steps below to create a blog post:

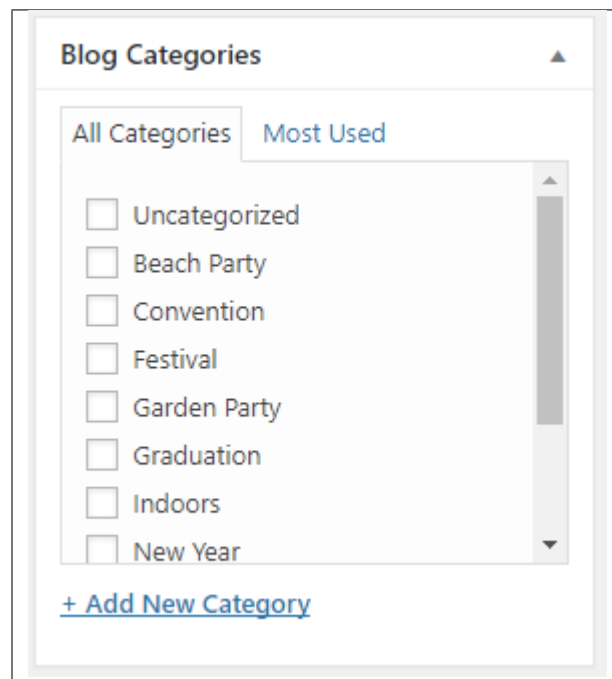

- **Step 1** - Navigate to *Blog Posts* > *Add New* in the Dashboard.

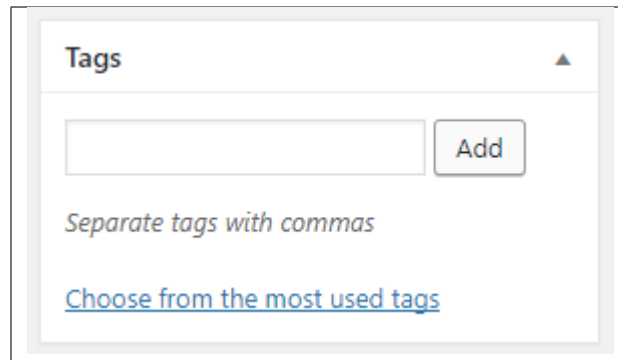

- **Step 2** - Create a title and insert your post content in the editing field. You can use any of our [shortcode](#) elements inside the post. If you want to use some additional fields, choose them from *Screen Options* at the top of the screen.

- **Step 3** - Add *Blog Categories* on the right side. Categories are meant for broad grouping of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. *Sub-categories* are made when a Category is added to a Parent Category . To assign it to the post, check the box next to the Category name.

- **Step 4** - To add *Tags*, write the Tags at the textbox below the Blog Categories. Tags are meant to describe specific details of your posts. They are the micro-data that you can use to micro-categorize your content. Tags are not hierarchical. Type the name of the tag in the field, separate multiple tags with commas.

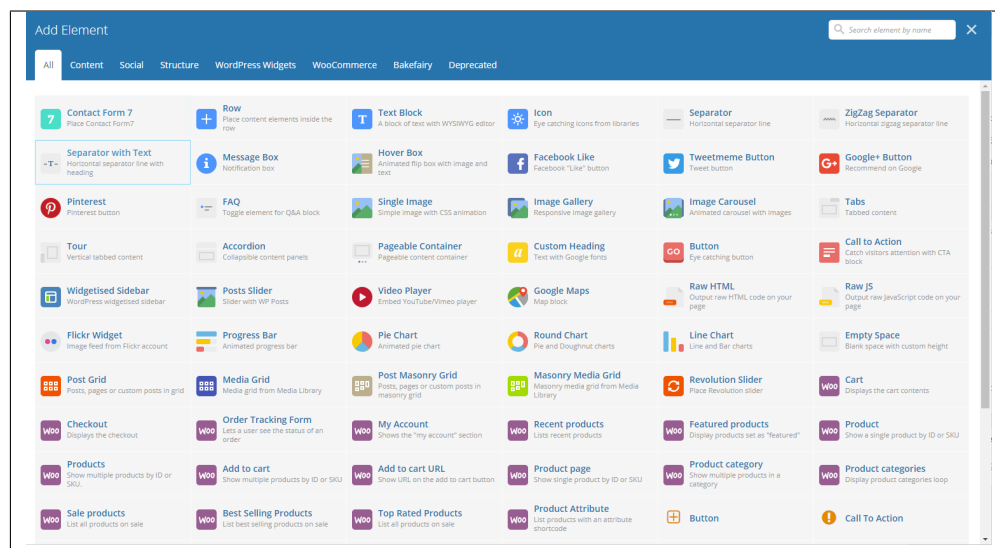

- **Step 5** - To add a *Single image*, click the Featured Image box, select an image and click *Set Featured Image*.

To add more than one image, use *Image Gallery* (Visual Composer element) , each image will be a slide in the gallery slideshow.

Gallery can be created by adding images from Media gallery or by adding External links of the images that will be used.

- **Step 6** – To post *Video*, use Video Player (Visual Composer element) and paste the direct video URL from Youtube, Vimeo or Dailymotion and more.
- **Step 7** – to post *Audio*, use Video Player (Visual Composer element) and paste the direct audio URL from Soundcloud, Mixcloud and more.

- **Step 8** – For *Quotation*, use WordPress *Blockquote* option (Shift + Alt + Q).

- **Step 9** – For *Links*, use WordPress *Inser/Edit Link* option (Ctrl + K).

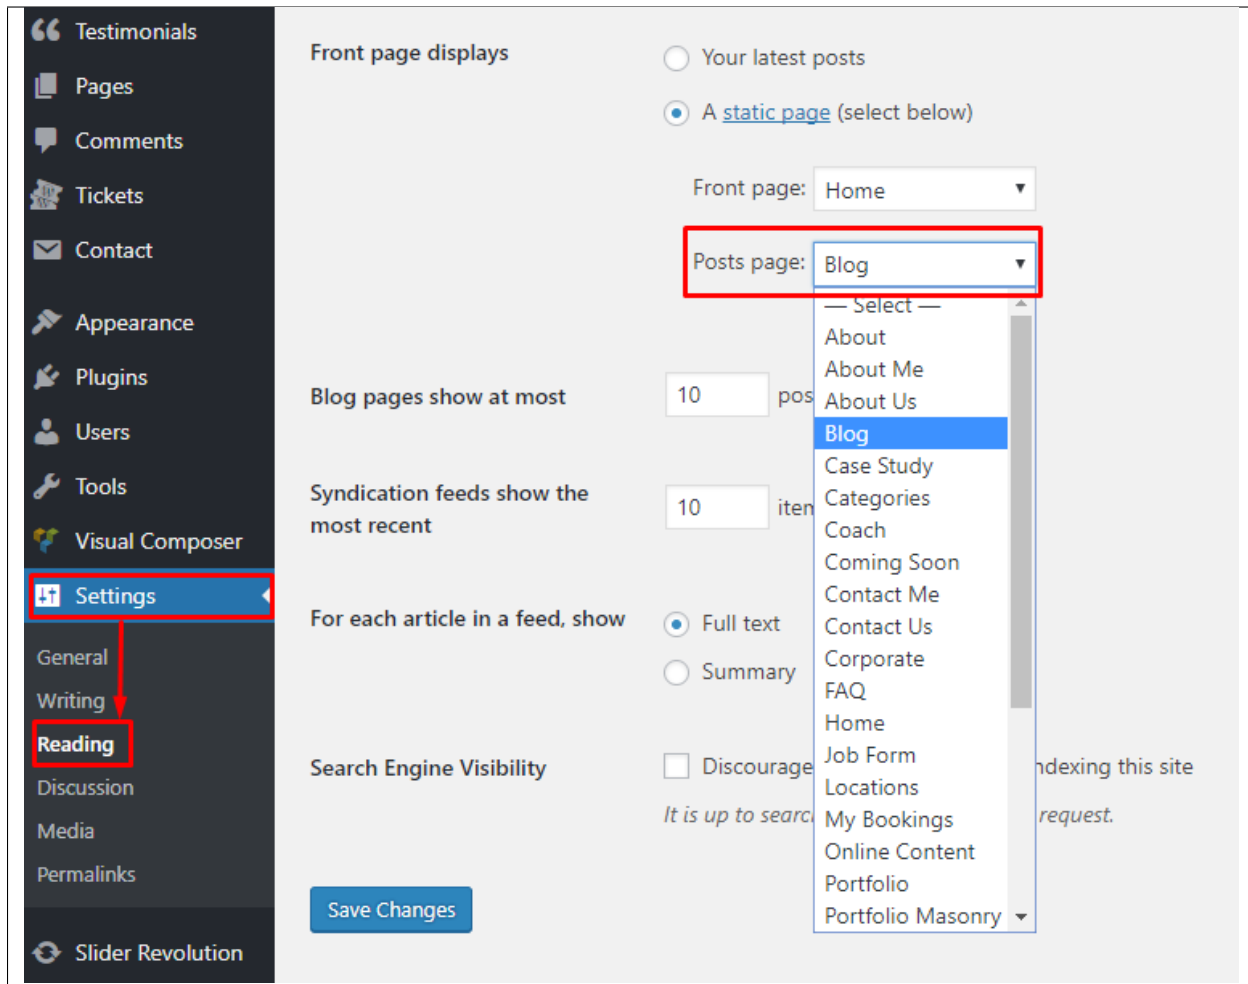

- **Step 10** – Create an excerpt – *Excerpts* are optional hand-crafted summaries of your content that can be used in your theme. [Learn more about manual excerpts.](#)
- **Step 11** – Once finished, click *Publish* to save the post.

You will see all the Blogs created at *Blog Posts > All Posts*.

## 4.2 Blog Index Page

The most popular way of displaying blog posts is to setup *blog index page*. There all of your posts will be displayed and ordered by publish date.

To set the page as your post page, navigate to Posts page tool in *Settings > Reading* and choose Blog index page from the ones you created.

**Note:** On Blog index page you will see only your posts, so don't add any other content to it.

## 4.3 Blog Category

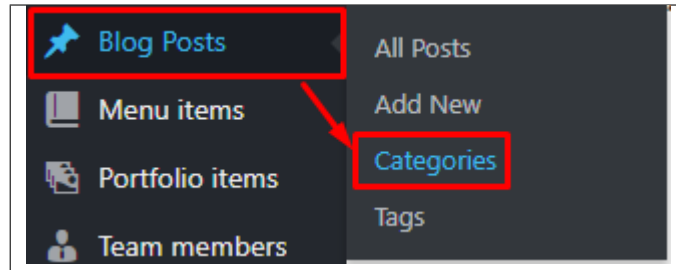

**Categories** are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a blog would make it easier to locate and post on similar topics by category.

### 4.3.1 Create Blog Category

To create a *Category* for a blog, follow these steps:

- **Step 1** - Navigate your Dashboard to *Blog Posts > Categories*. You will see the *Blog Categories* page.

- **Step 2** - In the page, find the *Add New Category* area. Add All the necessary information.

### Add New Category

Name

*The name is how it appears on your site.*

Slug

*The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.*

Parent Category

None ▼

*Categories, unlike tags, can have a hierarchy. You might have a Jazz category, and under that have children categories for Bebop and Big Band. Totally optional.*

Description

*The description is not prominent by default; however, some themes may show it.*

Add New Category

- **Name** - The name of the category.
- **Slug** - The URL-friendly version of the name. Usually all lowercase.

- **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
- **Description** - Description of the category.
- **Step 3** - Once done filling out the information of the category, click on *Add New Category* button to save.

### 4.3.2 Delete Blog Category

To delete a Category, navigate your Dashboard to *Blog Posts > Categories*.

In the *Blog Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

## 4.4 Blog Tags

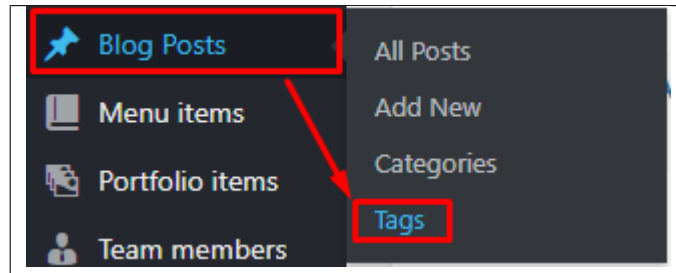

**Tags** are meant to describe *specific details* of your posts. They are the micro-data that you can use to micro-categorize your content. Tags are not hierarchical.

Adding tags to a blog post would make it easier to relate a post with another post even if the categories are different.

### 4.4.1 Create Blog Tags

To create a *Tag* for a blog, follow these steps:

- **Step 1** - Navigate your Dashboard to *Blog Posts > Tags*. You will see the *Tags* page.

- **Step 2** - In the page, find the *Add New Tag* area. Add All the necessary information.

### Add New Tag

Name

*The name is how it appears on your site.*

Slug

*The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.*

Description

*The description is not prominent by default; however, some themes may show it.*

Add New Tag

- **Name** - The name of the tag.
- **Slug** - The URL-friendly version of the name. Usually all lowercase.
- **Description** - Description of the tag.

- **Step 3** - Once done filling out the information of the tag, click on *Add New Tag* button to save.

---

**Note:** Adding a tag may affect the tags from other component of the site.

---

#### 4.4.2 Delete Blog Tags

To delete a tag, navigate your Dashboard to *Blog Posts > Tags*.

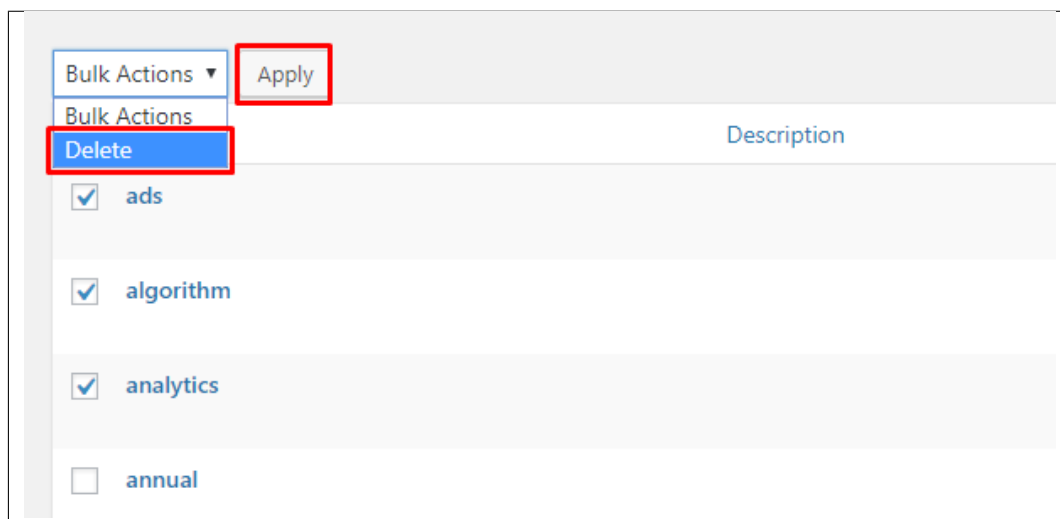

In the *Tags* page, you will see all the created tags.

To delete a tag, you have two options:

- **Single Delete** - Hover your mouse pointer on the tag that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple tags, click on the box beside the tags you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

---

**Note:** Deleting a tag may affect the tags from other component of the site.

---

### 5.1 Create New Menu Items

To create a new Menu Item, follow these steps:

- **Step 1** - To start creating an Menu, on your *Dashboard* navigate to *Menu Items > Add New*. The *Add New Menu item* page will show.

- **Step 2** - Once your in the *Add New Menu Item* page, you can add details about the Menu item like title, pictures, etc., to help with the promotion of the Menu item.
- **Step 3** - This are the needed information for the Menu, you can add the details.

**Add New Menu item**

### 5.1.1 Add Menus to Page

To add Menu Items to a page, an element in the Visual Composer is used: Menu

This is the element that will add a Menus on the page. For more information about these elements, go to [Bakefairy Custom Shortcodes > Menu](#).

## 5.2 Menu Items Category

**Categories** are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a Menu Item would make it easier to locate and post on similar topics by category.

### 5.2.1 Create Menu Items Category

To create a *Category* for a Menu Item, follow these steps:

- **Step 1** - Navigate your Dashboard to *Menu Items > Menu Categories*. You will see the *Menu Categories* page.

- **Step 2** - In the page, find the *Menu Categories* area. Add All the necessary information.

## Menu Categories

**Add New category**

**Name**

*The name is how it appears on your site.*

**Slug**

*The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.*

**Parent Menu Category**

None ▾

*Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.*

**Description**

*The description is not prominent by default; however, some themes may show it.*

**Choose image**

Upload

Add New category

- **Name** - The name of the category.
  - **Slug** - The URL-friendly version of the name. Usually all lowercase.
  - **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
  - **Description** - Description of the category.
  - **Choose image** - Image used for the category.
- **Step 3** - Once done filling out the information of the category, click on *Add New Category* button to save.

### 5.2.2 Delete Menu Items Category

To delete a Category, navigate your Dashboard to *Menu Items > Menu Categories*.

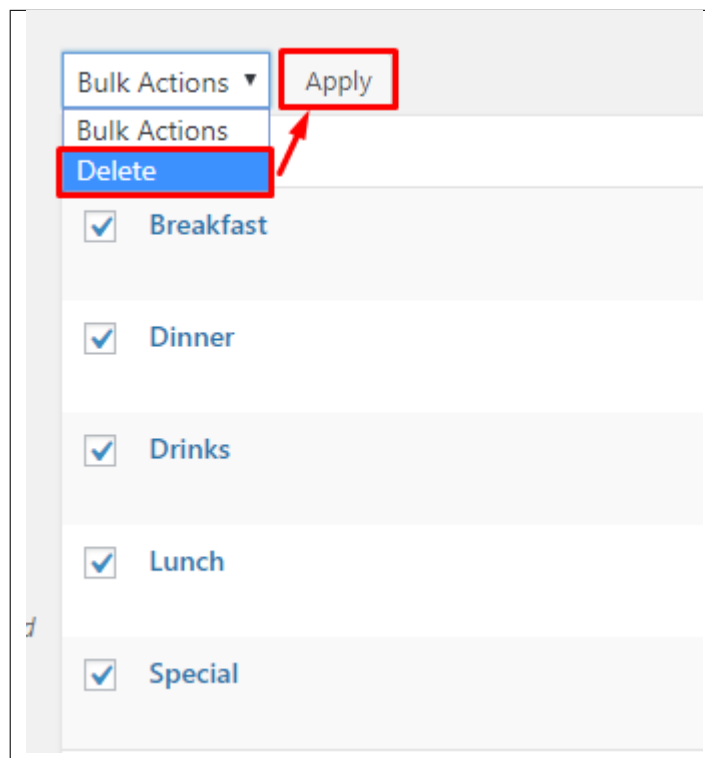

In the *Menu Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

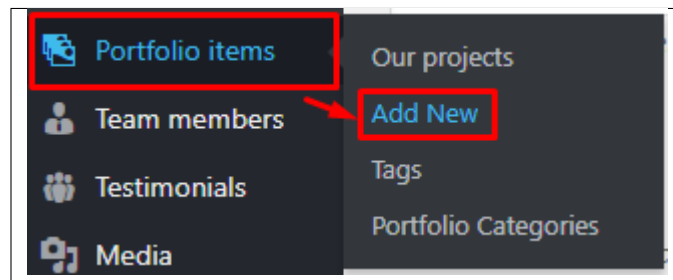

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

#### 6.1 Create New Portfolio Item

To create a new *Portfolio Item*, navigate in WordPress Dashboard to *Portfolio Items > Add New*.

The *Add New Portfolio Item* page will show. Add the details for the *Portfolio Item* item.

The screenshot shows the 'Add New Portfolio Item' form. It includes a title field (1), a rich text editor with a media adder (2), a 'Portfolio settings' section (3) with fields for Project Name, Date and Time, Project Type, Select gallery items, and a Display Related Post checkbox, a Tags section (4), a Portfolio Categories section (5) with a list of categories and an 'Add New category' link, a Featured Image section (6) with a 'Set featured image' link, and a right sidebar with Publish, Save Draft, Preview, Status, Visibility, and Publish immediately options.

1. **Title** - Title of the Portfolio Item.
2. **Editor container** - You can add text descriptions, images, video, etc., about the Portfolio Item on this area.
3. **Portfolio settings**
  - **Project Name** - Name of the project or event of this portfolio.
  - **Date and Time** - Date and time of the project.
  - **Project Type** - Type of the project.
  - **Select gallery items** - Choose images to add in the portfolio from the project.
  - **Display Related Post** - Option to show related posts in the single view of this portfolio.
4. **Tags** - Specific details that can be use to group this portfolio with other portfolio.
5. **Portfolio Categories** - A broad detail that can categorize this portfolio with other portfolio.

6. **Featured Image** - The image shown in the pages with portfolio.

After adding all the details, click on *Publish* button to save.

### 6.1.1 Delete Portfolio Item

To delete a Portfolio Item, navigate your Dashboard to *Portfolio Items > Our projects*

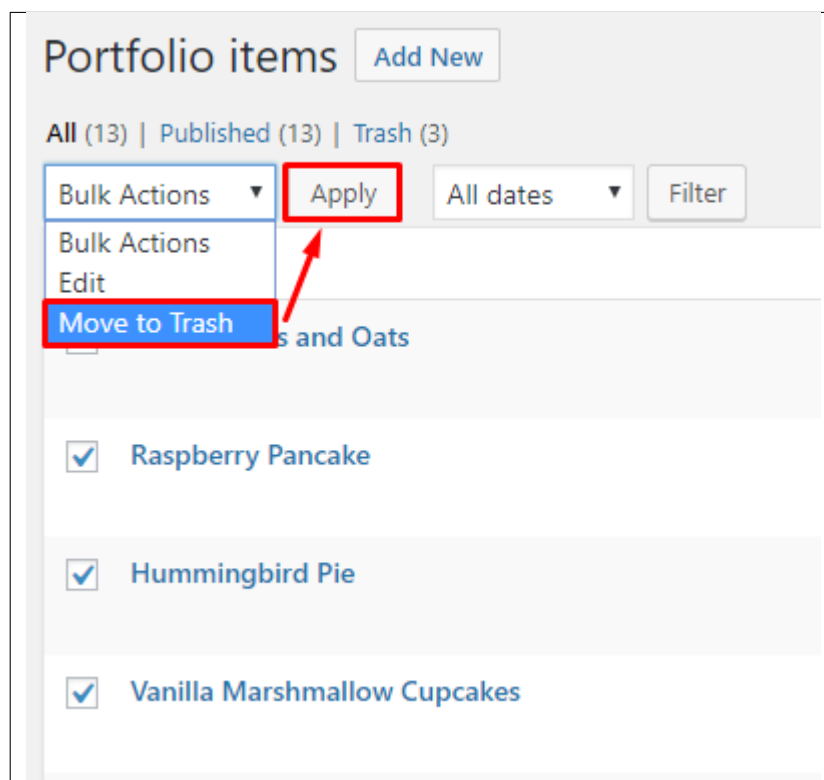

In the Portfolio Items page, you will see all the created Portfolio Item.

To delete a Portfolio Item, you have two options:

- **Single Portfolio Item Delete** - Hover your mouse pointer on the Portfolio Item that you would like to delete. You will see a *Trash* option pop-up. Click on *Trash* to delete.

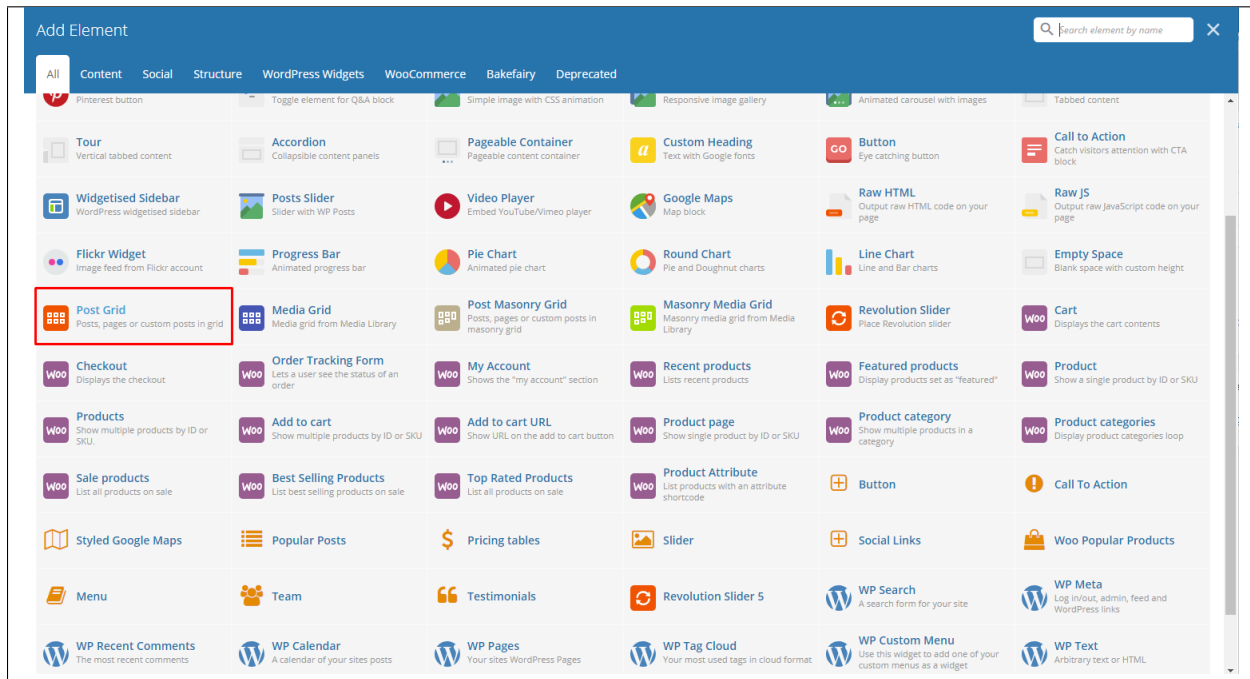

- **Multiple Portfolio Item Delete** - To delete multiple galleries, click on the box beside the Portfolio Item you would want to delete. Then click on the drop-down box for *Bulk Actions* and choose the *Move to Trash* option. Click on *Apply* button to delete.

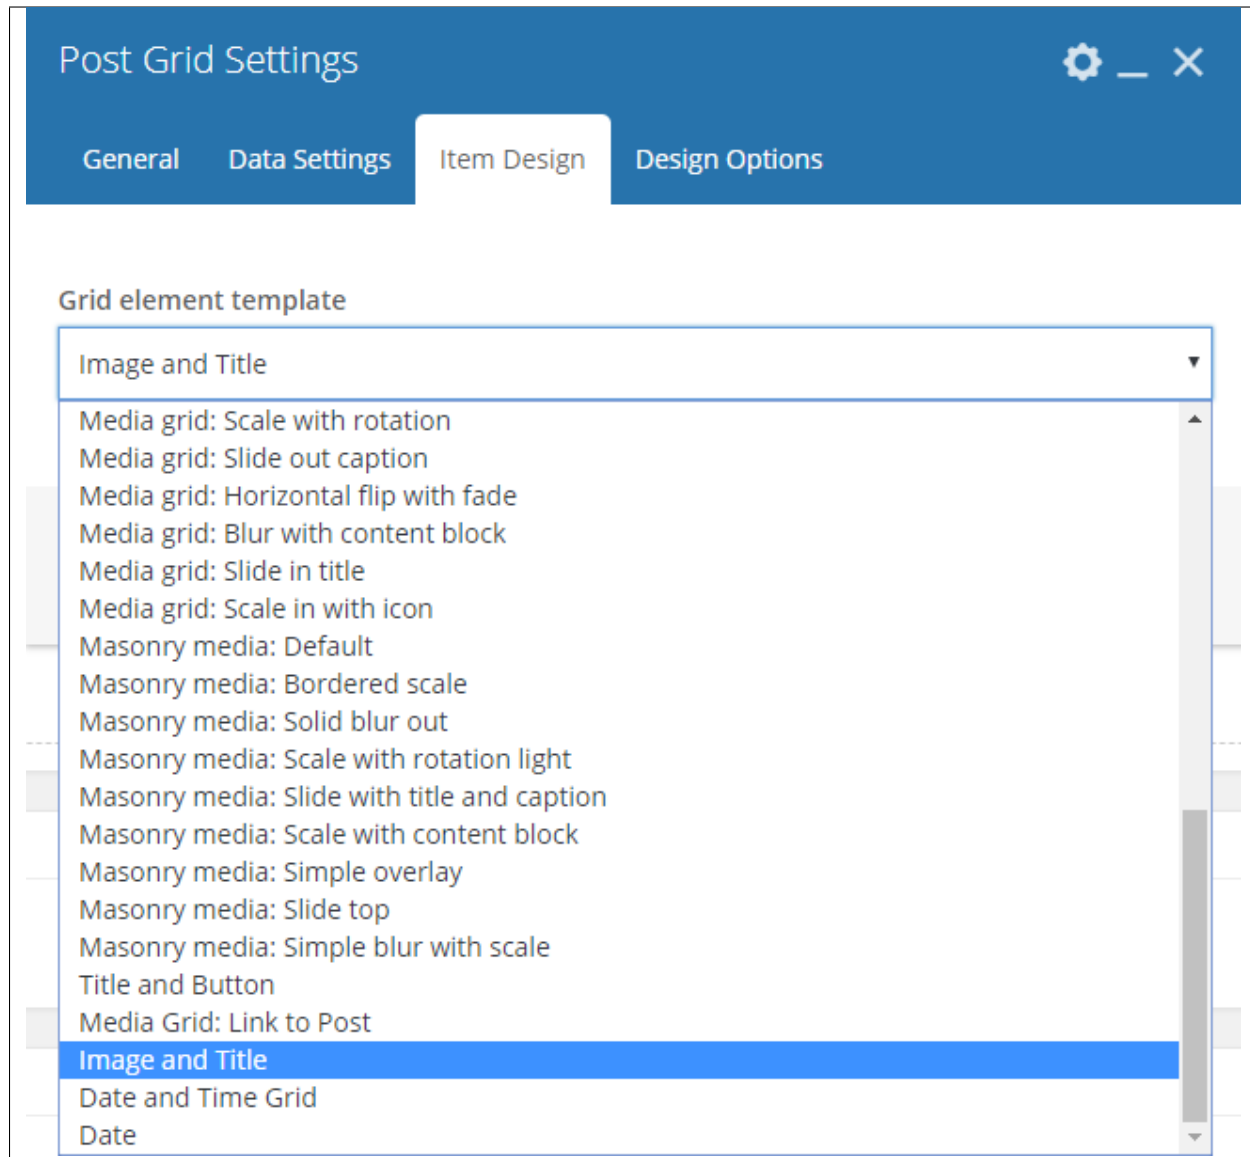

## 6.1.2 Add Portfolio Items to Page

To add a Portfolio Item to a page, an element in the Visual Composer is used: Post Grid

This is the element that will add a Portfolio Item on the page.

In the **Item Design** tab of the **Post Grid Settings**, choose the grid template you want to use.

**Note:** To create a grid template the same as the one in the demo, go to [Portfolio > Create Portfolio Grid Template](#) .

## 6.2 Portfolio Items Category

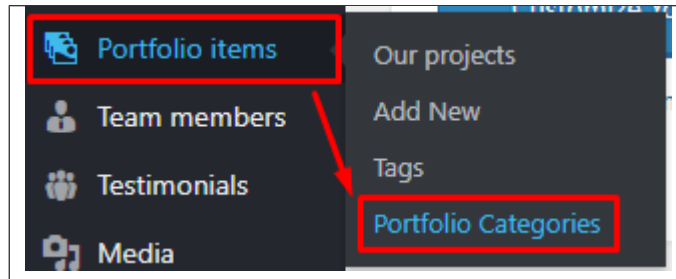

**Categories** are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a Portfolio Item would make it easier to locate and post on similar topics by category.

### 6.2.1 Create Portfolio Items Category

To create a *Category* for a Portfolio Item, follow these steps:

- **Step 1** - Navigate your Dashboard to *Portfolio Items > Portfolio Categories*. You will see the *Portfolio Categories* page.

- **Step 2** - In the page, find the *Portfolio Categories* area. Add All the necessary information.

## Portfolio Categories

**Add New category**

- **Multiple Team members Delete** - To delete multiple Team members, click on the box beside the Team members you would want to delete. Then click on the drop-down box for *Bulk Actions* and choose the *Move to Trash* option. Click on *Apply* button to delete.

### 7.1.2 Add Team members to Page

To add Team members to a page, an element in the Visual Composer is used: Team

This is the element that will add a Team members on the page. For more information about these elements, go to [Bakefairy Custom Shortcodes > Team](#).

## 7.2 Team Members Category

**Categories** are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a Team member would make it easier to locate and post on similar topics by category.

### 7.2.1 Create Team Members Category

To create a *Category* for a Team member, follow these steps:

- **Step 1** - Navigate your Dashboard to *Team members > Team Categories*. You will see the *Team Categories* page.

- **Step 2** - In the page, find the *Add New Category* area. Add All the necessary information.

## Team Categories

### Add New category

Name

*The name is how it appears on your site.*

Slug

*The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.*

Parent Team Category

None ▾

*Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.*

Description

*The description is not prominent by default; however, some themes may show it.*

Add New category

- **Name** - The name of the category.
  - **Slug** - The URL-friendly version of the name. Usually all lowercase.
  - **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
  - **Description** - Description of the category.
- **Step 3** - Once done filling out the information of the category, click on *Add New Category* button to save.

## 7.2.2 Delete Team Members Category

To delete a Category, navigate your Dashboard to *Team members > Team Categories*.

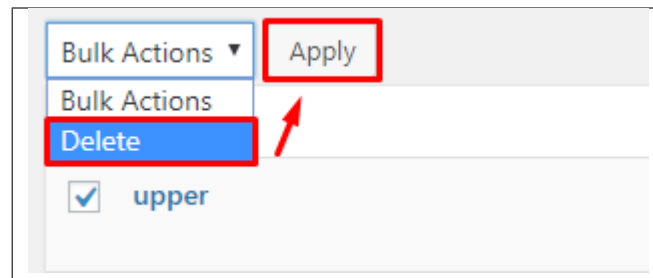

In the *Team Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

---

### Testimonials

---

A *Testimonial* is a statement that testify to someone's character and qualifications. You can use this statements on your page to establish confidence.

#### 8.1 Create Testimonials

To create a new testimonial, on your *Dashboard* navigate to *Testimonials > Add New*.

The *Add New Testimonial* page will show. Add the details for the testimonial.

The screenshot shows the 'Add New Testimonial' form. It includes a title field, a rich text editor, a section for author details (Name, Place), a section for testimonial categories, and a featured image section. The form is designed to be user-friendly with clear labels and a logical flow.

1. **Title** - The title of the testimonial.
2. **Editor container** - You can add here the testimonial.
3. **Author**
  - Name - The name of the one who said the testimonial.
  - Place - Location of the author.
4. **Testimonial Categories** - A broad detail that can categorize this portfolio with other portfolio.
5. **Featured Image** - Author's picture.

After adding all the details, click on *Publish* button to save.

### 8.1.1 Delete Testimonials

To delete a Testimonial, navigate your Dashboard to *Testimonials > All Testimonials*

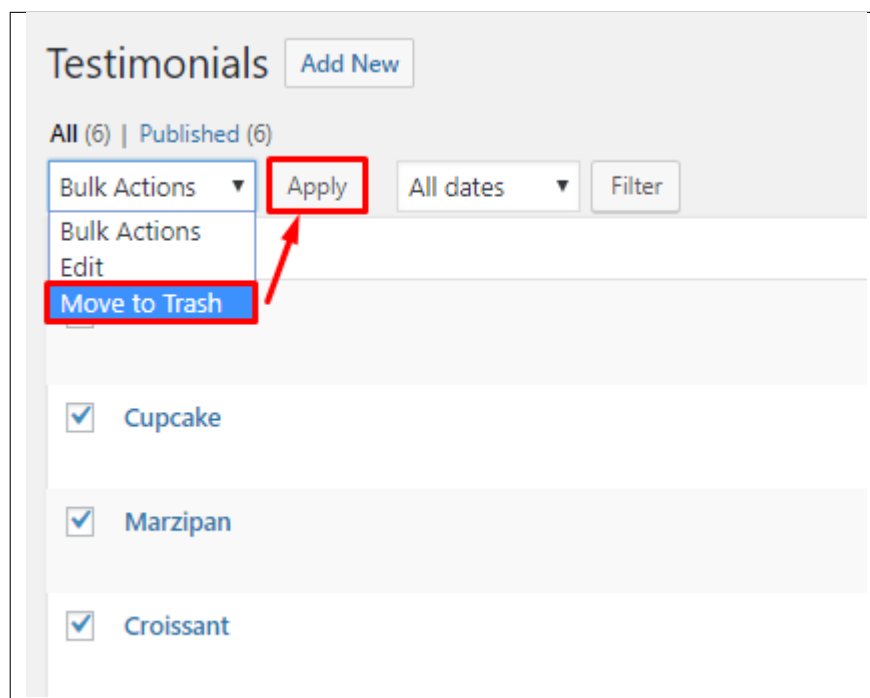

In the Testimonials page, you will see all the created testimonials.

To delete a testimonial, you have two options:

- **Single Testimonial Delete** - Hover your mouse pointer on the testimonial that you would like to delete. You will see a *Trash* option pop-up. Click on *Trash* to delete.

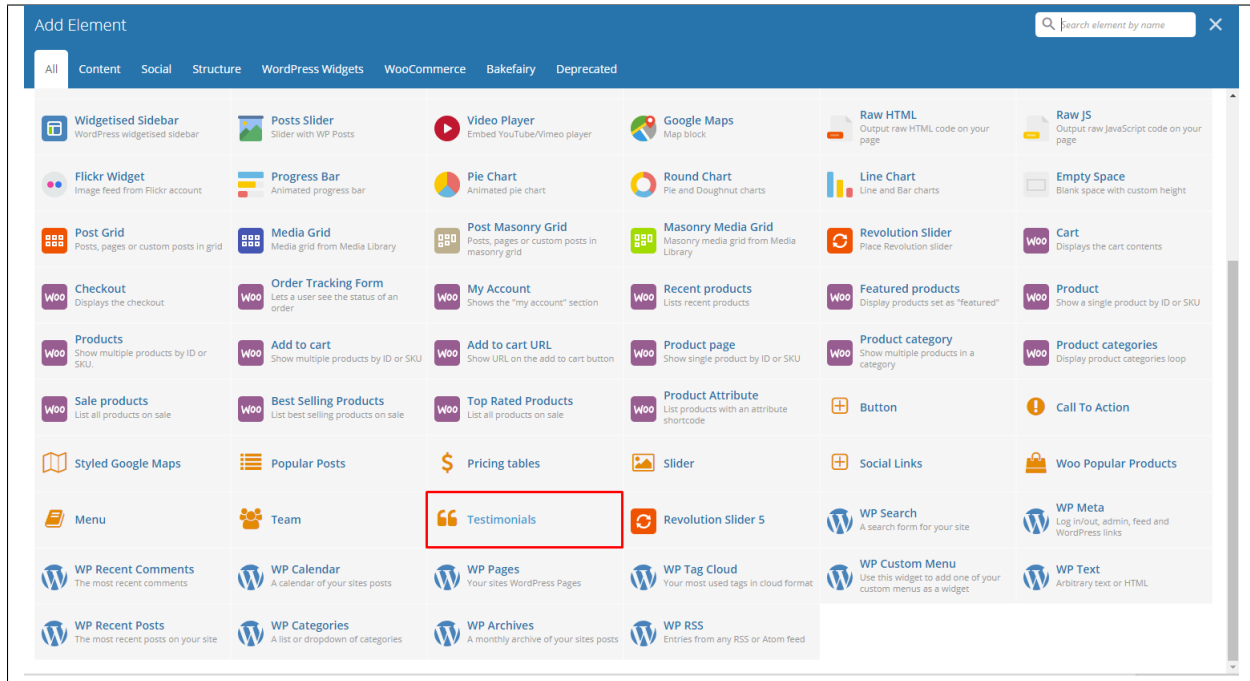

- **Multiple Testimonials Delete** - To delete multiple testimonials, click on the box beside the testimonials you would want to delete. Then click on the drop-down box for *Bulk Actions* and choose the *Move to Trash* option. Click on *Apply* button to delete.

### 8.1.2 Add Testimonials to Page

To add Testimonials to a page, an element in the Visual Composer is used: Testimonials

This is the element that will add a Testimonials on the page. For more information about these elements, go to [Bakefairy Custom Shortcodes > Testimonials](#).

## 8.2 Testimonials Category

**Categories** are meant for *broad grouping* of your posts, think of these as general topics. Categories are hierarchical, so you can add sub-categories. **Sub-categories** are made when a Category is added to a Parent Category.

Adding categories to a testimonial would make it easier to locate and post on similar topics by category.

### 8.2.1 Create Testimonials Category

To create a *Category* for a testimonial, follow these steps:

- **Step 1** - Navigate your Dashboard to *Testimonials > Categories*. You will see the *Testimonials Categories* page.

- **Step 2** - In the page, find the *Add New Category* area. Add All the necessary information.

## Testimonial Categories

### Add New category

Name

*The name is how it appears on your site.*

Slug

*The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.*

Parent Testimonial Category

None ▾

*Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.*

Description

*The description is not prominent by default; however, some themes may show it.*

Add New category

- **Name** - The name of the category.
  - **Slug** - The URL-friendly version of the name. Usually all lowercase.
  - **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
  - **Description** - Description of the category.
- **Step 3** - Once done filling out the information of the category, click on *Add New Category* button to save.

## 8.2.2 Delete Testimonials Category

To delete a Category, navigate your Dashboard to *Testimonials > Categories*.

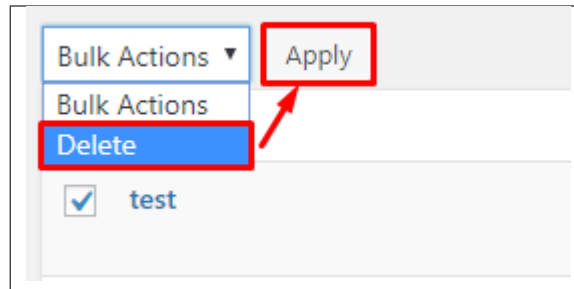

In the *Testimonials Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

---

### Products

---

#### 9.1 Create Products

To create a new *Products* item, navigate in WordPress Dashboard to *Products > Add New*.

The *Add new product* page will show. Add the details for the Products.

The screenshot displays the Magento 2 product creation interface. The interface is divided into several sections, with numbered callouts highlighting specific areas:

- 1. Product name:** A text input field at the top left for entering the product title.
- 2. Editor container:** A rich text editor area below the product name, featuring a toolbar with various formatting options (bold, italic, link, etc.) and a text area for the product description.
- 3. Product data:** A section containing tabs for 'General', 'Inventory', 'Shipping', 'Linked Products', 'Attributes', and 'Advanced'. The 'General' tab is active, showing fields for 'Regular price (\$)' and 'Sale price (\$)', along with checkboxes for 'Virtual' and 'Downloadable'.
- 4. Product short description:** A smaller rich text editor area below the main editor, used for a brief product summary.
- 5. Product categories:** A section on the right sidebar showing a list of categories (Flowers, Gift Baskets, Sympathy Cards) with checkboxes and an 'Add new category' link.
- 6. Product tags:** A section on the right sidebar for adding tags, including an 'Add' button and a link to 'Choose from the most used tags'.
- 7. Product image:** A section on the right sidebar with a 'Set product image' link.
- 8. Product gallery:** A section on the right sidebar with an 'Add product gallery images' link.

Additional elements visible include a 'Publish' button at the top right, a 'Status: Draft' indicator, and a 'Catalog visibility' dropdown set to 'Shop and search results'.

1. **Title** - The name of the Products.
2. **Editor container** - You can add here the role of the Products that will be shown in the website.
3. **Product data**
  - **General Tab** - Information about the Products is added at this part.
    - Regular price (\$) - Actual price of the product.
    - Sale Price (\$) - Price of the product when on sale.
  - **Inventory Tab** -
    - SKU - (Stock Keeping Unit)
    - Manage stock? - - Stock status -
    - Sold individually -
  - **Shipping Tab** -
    - Weight (kg) -
    - Dimensions (cm) -

- Shipping class
  - **Linked Products Tab** -
    - Upsells -
    - Cross-sells -
  - **Attributes Tab** -
  - **Advanced Tab** -
    - Purchase note -
    - Menu order -
4. **Product short description** - Text beside the image for the product.
  5. **Product categories** - A broad detail that can categorize this product with other product.
  6. **Product tags** - Specific details that can be use to group this product with other product.
  7. **Product image** - Products picture that will be shown in the site.
  8. **Product gallery** - Images to add for the gallery of the product.

After adding all the details, click on *Publish* button to save.

### 9.1.1 Delete Products

To delete a Product, navigate your Dashboard to *Products > All Products*

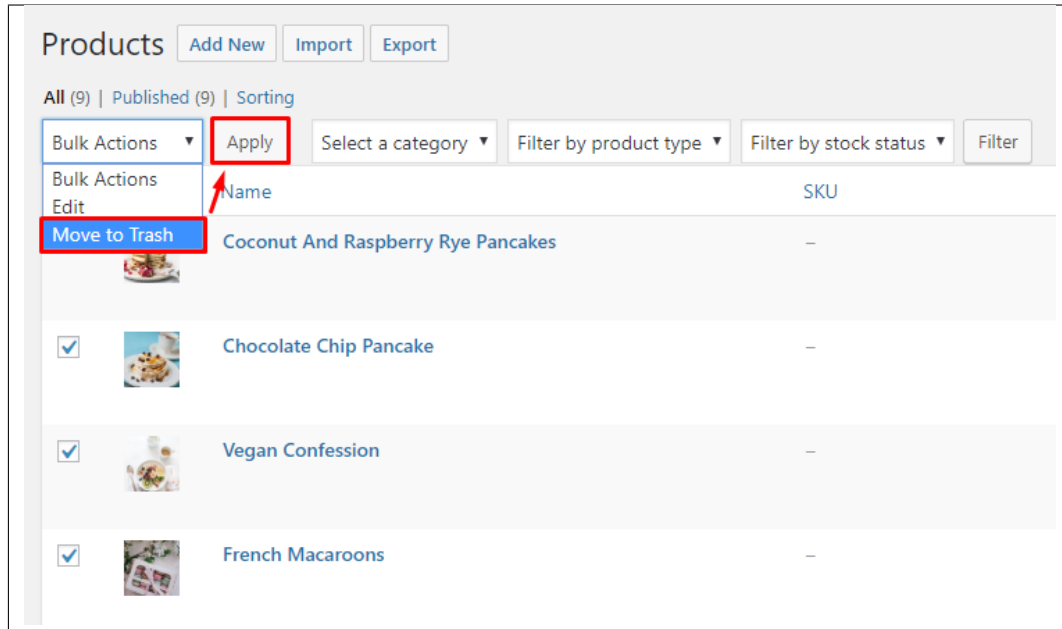

In the Products page, you will see all the created Products.

To delete a Product, you have two options:

- **Single Product Delete** - Hover your mouse pointer on the Product that you would like to delete. You will see a *Trash* option pop-up. Click on *Trash* to delete.

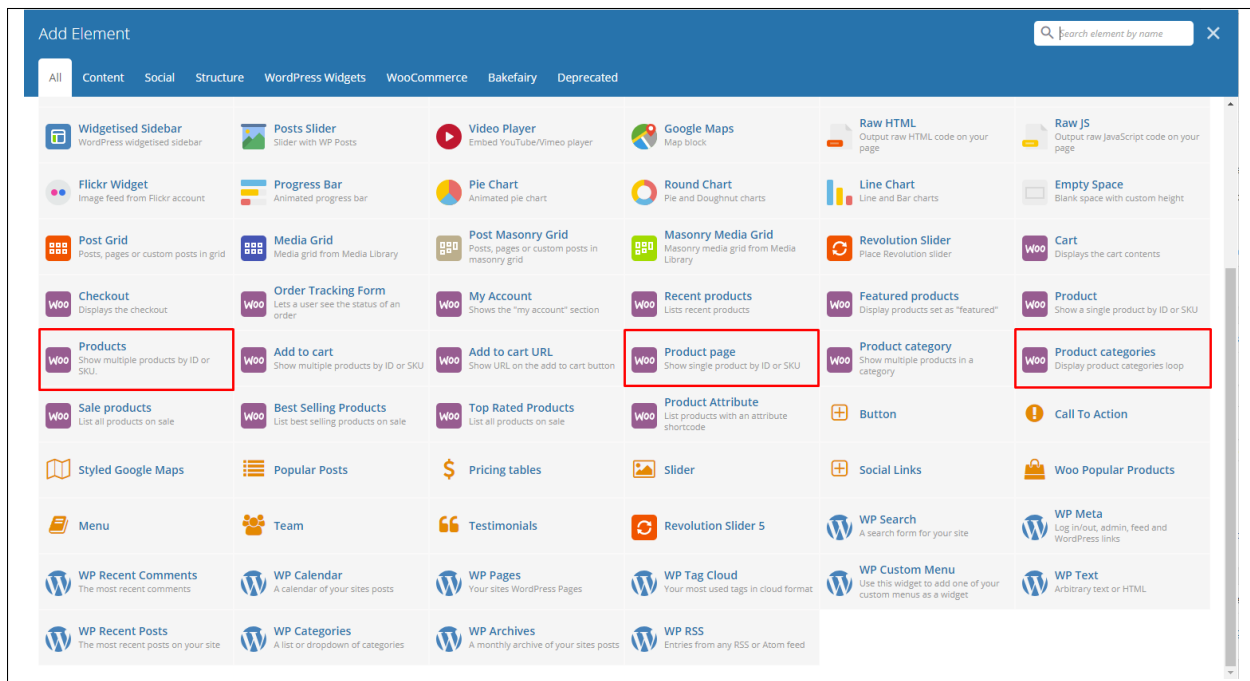

- **Multiple Products Delete** - To delete multiple Products, click on the box beside the Product you would want to delete. Then click on the drop-down box for *Bulk Actions* and choose the *Move to Trash* option. Click on *Apply* button to delete.

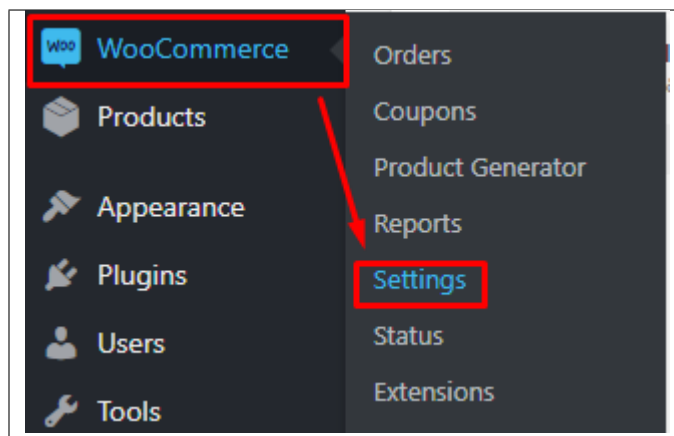

### 9.1.2 Add Product Items to Page

To add Products to a page, an element in the Visual Composer is used: *Product page*, *Products*, or *Product Category*

These elements will let you set the item to display in the page together with other elements.

You can also set a page to be the Products Archive page, go to *WooCommerce > Settings*.

In the *Products* tab, look for *Shop Page* and choose the page you want to use as the Product's page then click on *Save Changes* button.

Add new category

- **Name** - The name of the category.
- **Slug** - The URL-friendly version of the name. Usually all lowercase.
- **Parent Category** - If the category is a sub-category, then look for the parent category in the drop-down box.
- **Description** - Description of the category.

- **Display Type** - Type of display the category will have.
- **Thumbnail** - Image used for the category.
- **Step 3** - Once done filling out the information of the category, click on *Add New Category* button to save.

## 9.2.2 Delete Products Category

To delete a Category, navigate your Dashboard to *Products > Categories*.

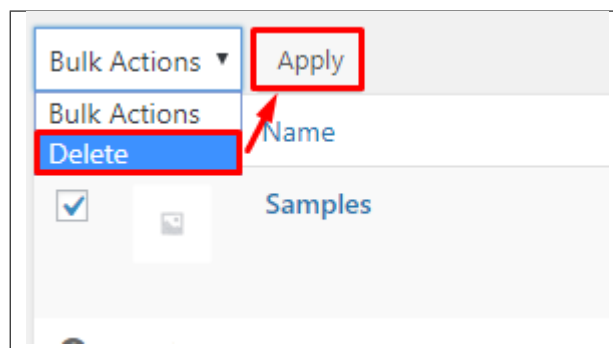

In the *Product Categories* page, you will see all the created category.

To delete a category, you have two options:

- **Single Delete** - Hover your mouse pointer on the category that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple categories, click on the box beside the categories you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

## 9.3 Products Tags

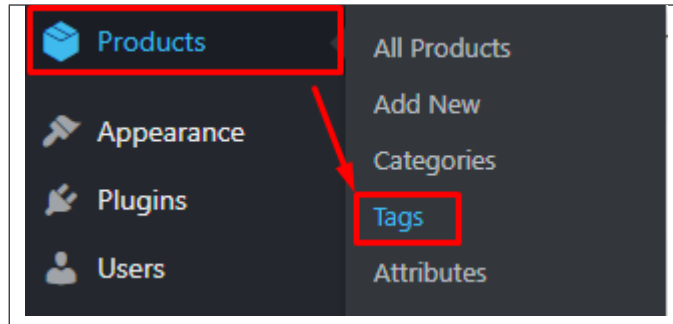

**Tags** are meant to describe *specific details* of your posts. They are the micro-data that you can use to micro-categorize your content. Tags are not hierarchical.

Adding tags to a Products post would make it easier to relate a post with another post even if the categories are different.

### 9.3.1 Create Products Tags

To create a *Tag* for a Products, follow these steps:

- **Step 1** - Navigate your Dashboard to *Products > Tags*. You will see the *Tags* page.

- **Step 2** - In the page, find the *Add New Tag* area. Add All the necessary information.

## Tags

### Add New Tag

Name

*The name is how it appears on your site.*

Slug

*The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.*

Description

*The description is not prominent by default; however, some themes may show it.*

[Add New Tag](#)

- **Name** - The name of the tag.
  - **Slug** - The URL-friendly version of the name. Usually all lowercase.
  - **Description** - Description of the tag.
- **Step 3** - Once done filling out the information of the tag, click on *Add New Tag* button to save.

---

**Note:** Adding a tag may affect the tags from other component of the site.

---

### 9.3.2 Delete Products Tags

To delete a tag, navigate your Dashboard to *Products > Tags*.

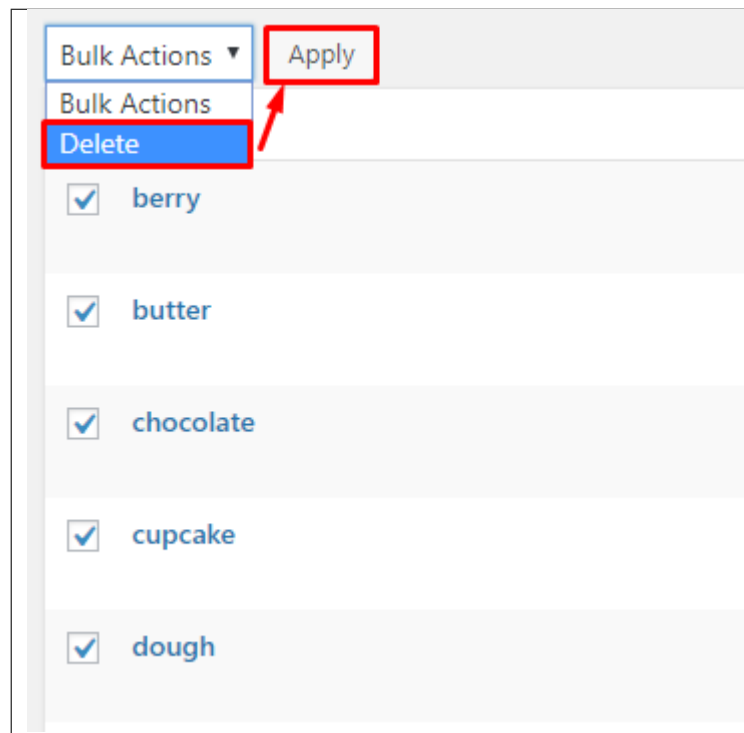

In the *Tags* page, you will see all the created tags.

To delete a tag, you have two options:

- **Single Delete** - Hover your mouse pointer on the tag that you would like to delete. You will see a *Delete* option pop-up. Click on *Delete* to delete.

- **Multiple Delete** - To delete multiple tags, click on the box beside the tags you would want to delete. Then click on the drop-down box for **Bulk Actions** and choose the *Delete* option. Click on *Apply* button to delete.

---

**Note:** Deleting a tag may affect the tags from other component of the site.

---

---

## Contact Form

---

### 10.1 Create Contact Form

To create a new *Contact Form* item, navigate in WordPress Dashboard to *Contact > Add New*.

The *Add New Contact Form* page will show. Add the details for the *Contact Form*.

1. **Title** - The title for the *Contact Form*
2. **Form Details** - Details and information of the form.
  - Form - The codes for the user interface of the form.
  - Mail - Set the email template of the form.
  - Messages - Message prompt when an action is done with the form.
  - Additional Settings - You can add customization code.

After adding all the details, click on *Save* button to save.

## 10.2 Create Contact Page

*Contact Form Page* of Sella is generated by the theme from *Contact Form* item.

To create an *Contact Form Page*, follow these steps:

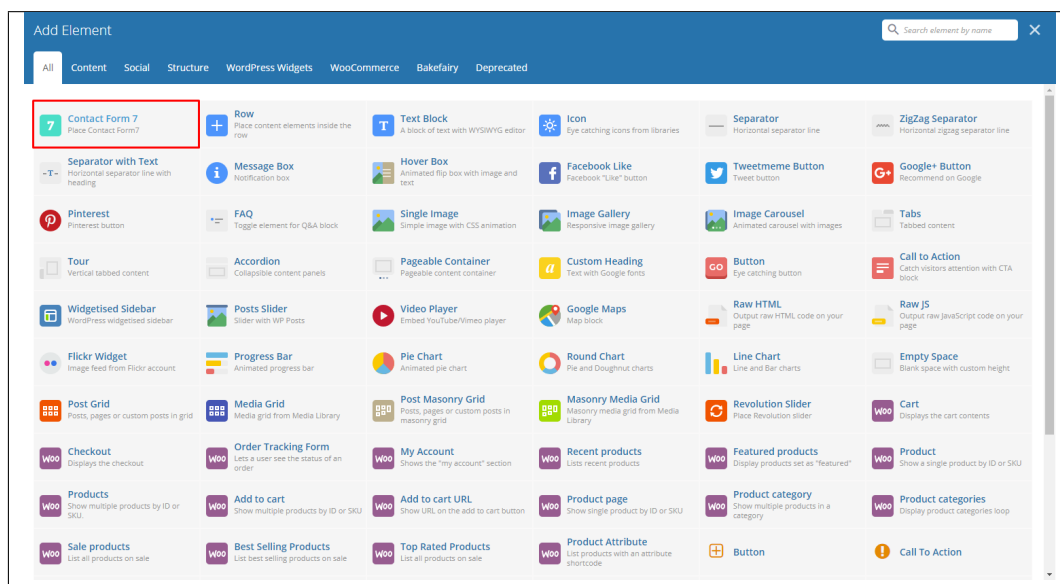

- **Step 1** - Create a new page where to add the *Contact Form*.

- **Step 2** - Add a row element to the page, click the *Edit this row* option of the row. The *Row Settings* will pop-up.

- **Step 3** - Change the settings to your preference.
- **Step 4** - In the row, to add a title for the page. You have the option to add a *Text Block* or *Section/Header Title* element.
- **Step 5** - Add a new row to add the *Contact Form* item. The *Contact Form* can be generated by *Contact Form 7* of *Theme Element*.

- **Step 6** - The *Contact Form 7 Settings* will pop-up. Change details as needed.

## MailChimp Plugin

---

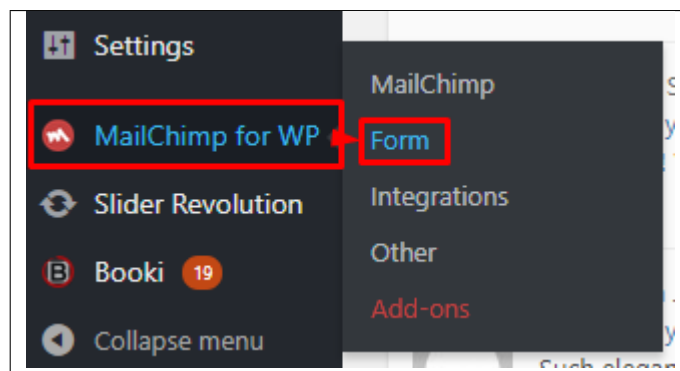

MailChimp for WordPress helps you add more subscribers to your MailChimp lists using various methods. You can create good looking opt-in forms or integrate with any other form on your site, like your comment, contact or checkout form.

### 11.1 Create New MailChimp Form

To start with making a MailChimp Form, you must set up a MailChimp list in your MailChimp Dashboard. You can read how to make a MailChimp list in this [article](#).

Once you have made the MailChimp list, you can make the MailChimp Form.

- In your wordpress dashboard go to *MailChimp for WP > Form*

---

**Note:** Free users: You should be taken to the 'Edit form' page straight away.

Premium users: you will need to make a new form by clicking the 'Create New Form' button atop the Sign-up Forms list.

---

- You will be redirected to *Edit Form*, you will see the content of the form here.

```

<div class="ct-newsletter">
<div class="form-group">
<div class="input-group">
<input type="text" name="FNAME" class="form-control ct-newsletter-name" placeholder="Firstname" required="">
<input type="text" name="LNAME" class="form-control ct-newsletter-name" placeholder="Lastname" required="">
<input type="email" name="EMAIL" class="form-control ct-newsletter-email" placeholder="Your email address" required="">
<button type="submit" class="btn ct-newsletter-button">Subscribe to newsletter</button>
</div>
</div>
</div>

```

- You can add a field in your form by clicking the buttons in *Choose a field to add to the form*. The items in the List fields are the items in your MailChimp list.

- To change the look of your form, you can go to the *Appearance* tab of the MailChimp form. You can choose the style in *Form Style*. You can customize the style of the form, just read these [article](#).
- Once you are done, click on the *Save Changes* button.

## 11.2 MailChimp Form on Page

### Directly to the Page

- You can add the MailChimp shortcode directly to the page where you would like to add it.

- You can get the MailChimp shortcode at the bottom of the Mailchimp Form or by clicking <> *Get shortcode* button below the title of the form.

<div class="ct-newsletter">
  <div class="form-group">
    <div class="input-group">
      <input type="text" name="FNAME" class="form-control ct-newsletter-name" placeholder="Firstname" required="">
      <input type="text" name="LNAME" class="form-control ct-newsletter-name" placeholder="Lastname" required="">
      <input type="email" name="EMAIL" class="form-control ct-newsletter-email" placeholder="Your email address" required="">
      <button type="submit" class="btn ct-newsletter-button">Subscribe to newsletter</button>
    </div>
  </div>
</div>
```

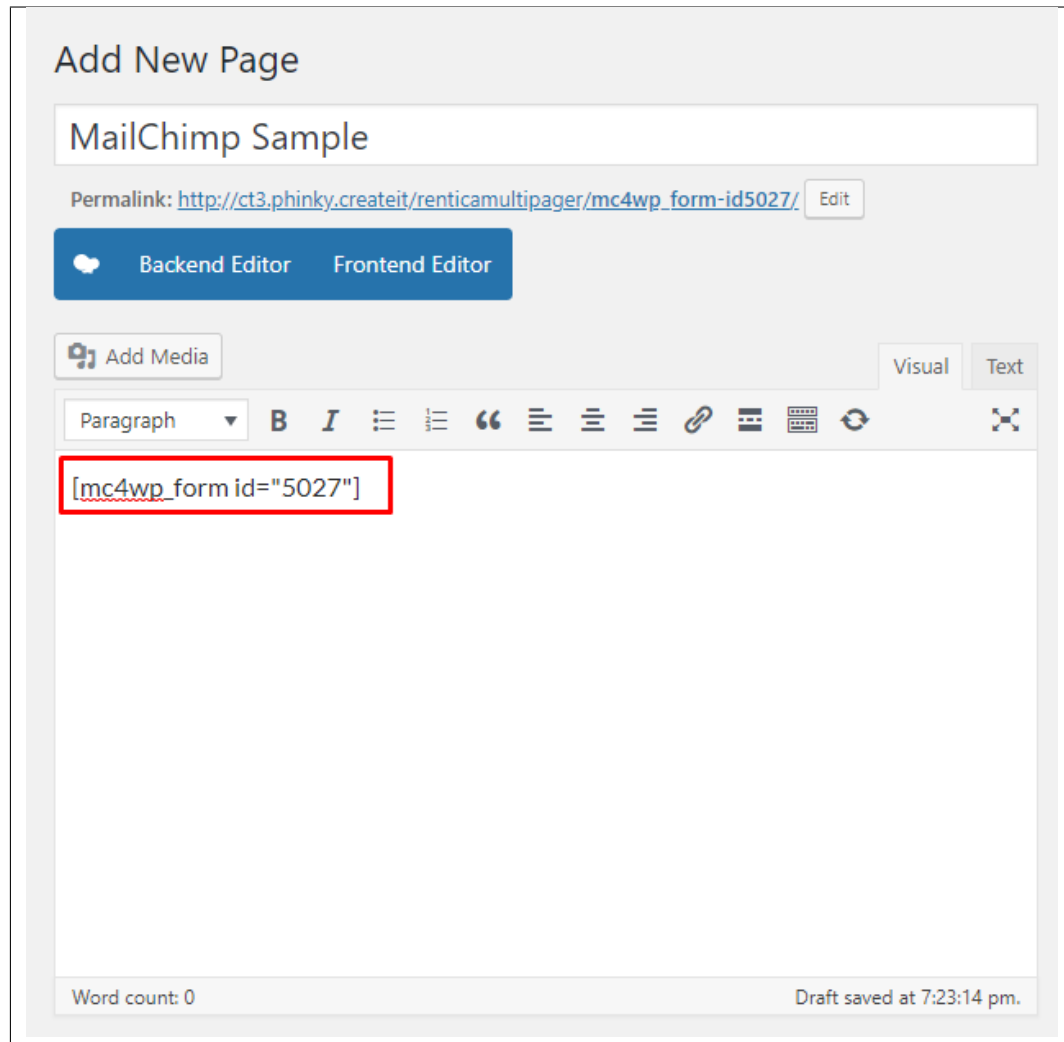

Save Changes

Use the shortcode `[mc4wp_form id="5027"]` to display this form inside a post, page or text widget.

- Create a new page where to add the the shortcode.

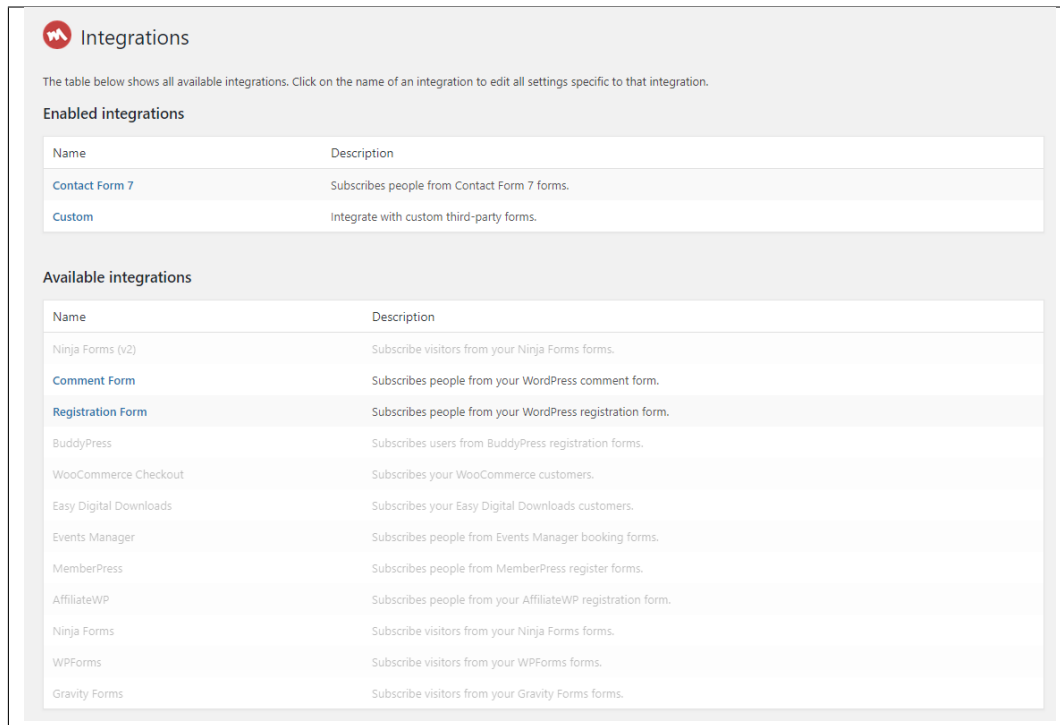

- Write the MailChimp shortcode at the Editor container.

- You can add other elements in the page if you like. Once done, click on publish.

### Integration with Contact Form 7

- You can see other plugins that can be integrated with MailChimp in *MailChimp for WP > Integrations*.
- Here you can see that contact form 7 is capable on integrating with MailChimp.

**Integrations**

The table below shows all available integrations. Click on the name of an integration to edit all settings specific to that integration.

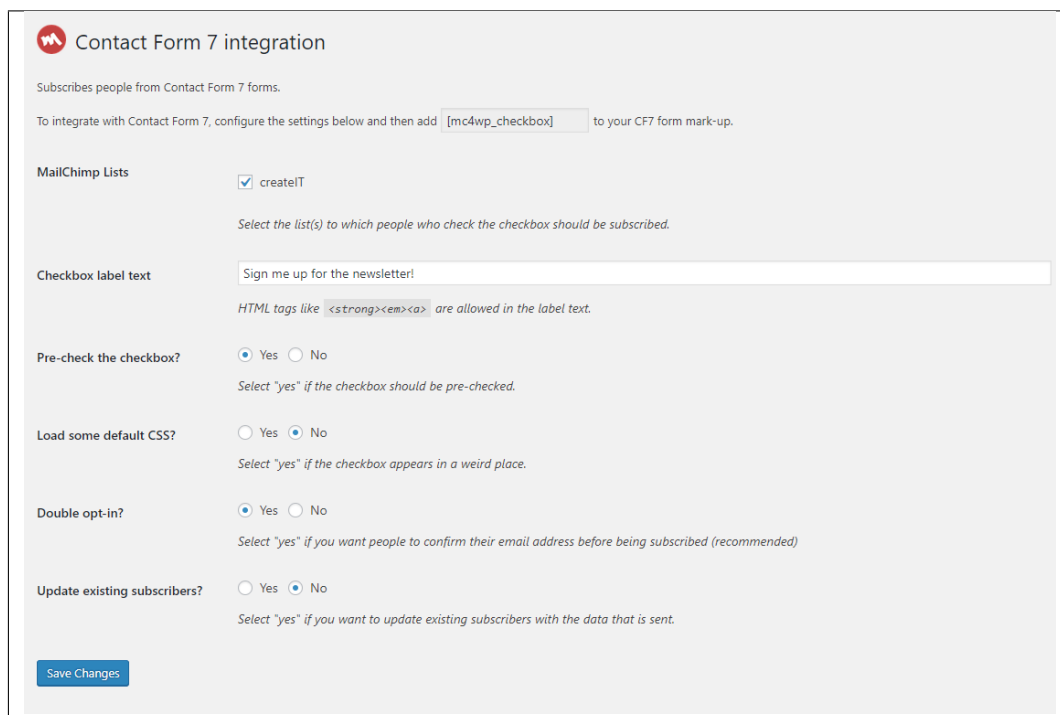

**Enabled integrations**

Name	Description
<a href="#">Contact Form 7</a>	Subscribes people from Contact Form 7 forms.
<a href="#">Custom</a>	Integrate with custom third-party forms.

**Available integrations**

Name	Description
<a href="#">Ninja Forms (v2)</a>	Subscribe visitors from your Ninja Forms forms.
<a href="#">Comment Form</a>	Subscribes people from your WordPress comment form.
<a href="#">Registration Form</a>	Subscribes people from your WordPress registration form.
<a href="#">BuddyPress</a>	Subscribes users from BuddyPress registration forms.
<a href="#">WooCommerce Checkout</a>	Subscribes your WooCommerce customers.
<a href="#">Easy Digital Downloads</a>	Subscribes your Easy Digital Downloads customers.
<a href="#">Events Manager</a>	Subscribes people from Events Manager booking forms.
<a href="#">MemberPress</a>	Subscribes people from MemberPress register forms.
<a href="#">AffiliateWP</a>	Subscribes people from your AffiliateWP registration form.
<a href="#">Ninja Forms</a>	Subscribe visitors from your Ninja Forms forms.
<a href="#">WPForms</a>	Subscribe visitors from your WPForms forms.
<a href="#">Gravity Forms</a>	Subscribe visitors from your Gravity Forms forms.

- Click on **Contact Form 7** under **Enabled Integration** to configure the settings.

**Contact Form 7 integration**

Subscribes people from Contact Form 7 forms.

To integrate with Contact Form 7, configure the settings below and then add `[mc4wp_checkbox]` to your CF7 form mark-up.

**MailChimp Lists** ☒ createIT

Select the list(s) to which people who check the checkbox should be subscribed.

**Checkbox label text**

HTML tags like `<strong><em><a>` are allowed in the label text.

**Pre-check the checkbox?** ☒ Yes ☐ No

Select "yes" if the checkbox should be pre-checked.

**Load some default CSS?** ☐ Yes ☒ No

Select "yes" if the checkbox appears in a weird place.

**Double opt-in?** ☒ Yes ☐ No

Select "yes" if you want people to confirm their email address before being subscribed (recommended)

**Update existing subscribers?** ☐ Yes ☒ No

Select "yes" if you want to update existing subscribers with the data that is sent.

[Save Changes](#)

- Once you are done with the configuration, click on *Save Changes* button.
- On your dashboard, go to *Contact > Add New* to create a integrated form in contact form 7.

- Add the title of the form then create the form by clicking the coding or clicking the buttons on what you would like the form to show.

```

- On the page where you want to add the contact form, add a Contact Form 7 element to the area you want the form to show.

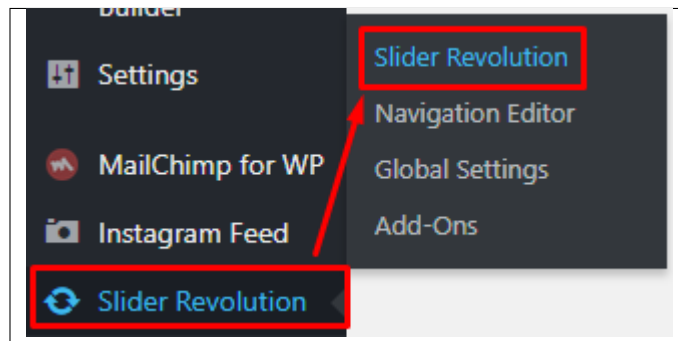

- Then select the form title of the form. You can add other elements in the page if you like. Once done, click on publish.

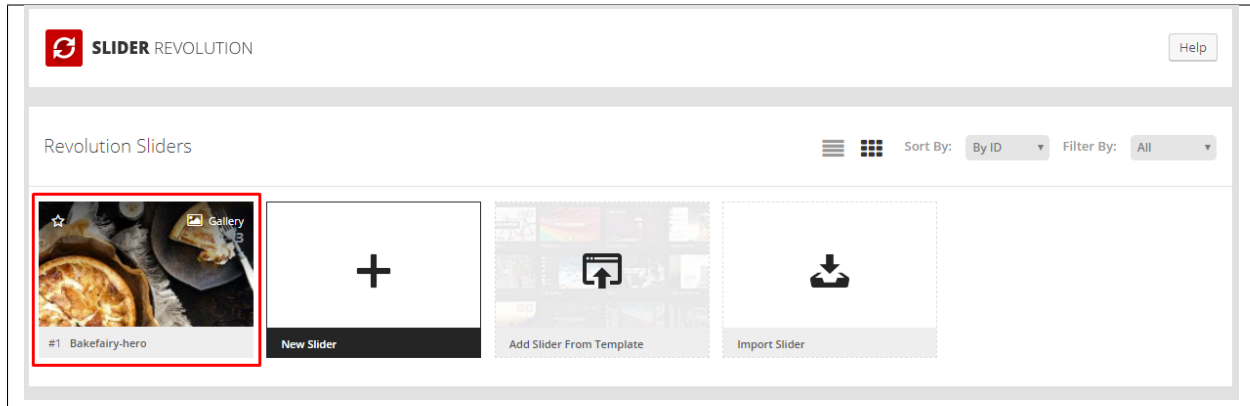

### 12.1 Edit a Revolution Slider

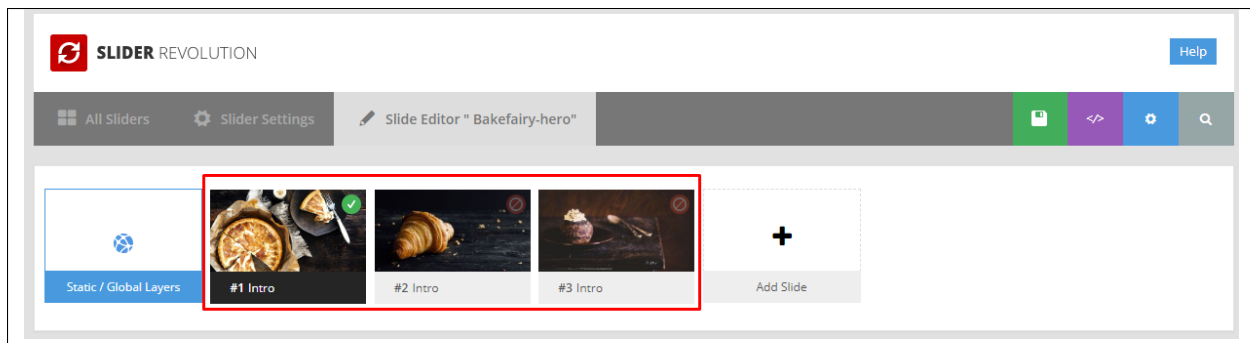

To edit an existing revolution slider, in your dashboard go to *Slider Revolution > Slider Revolution*.

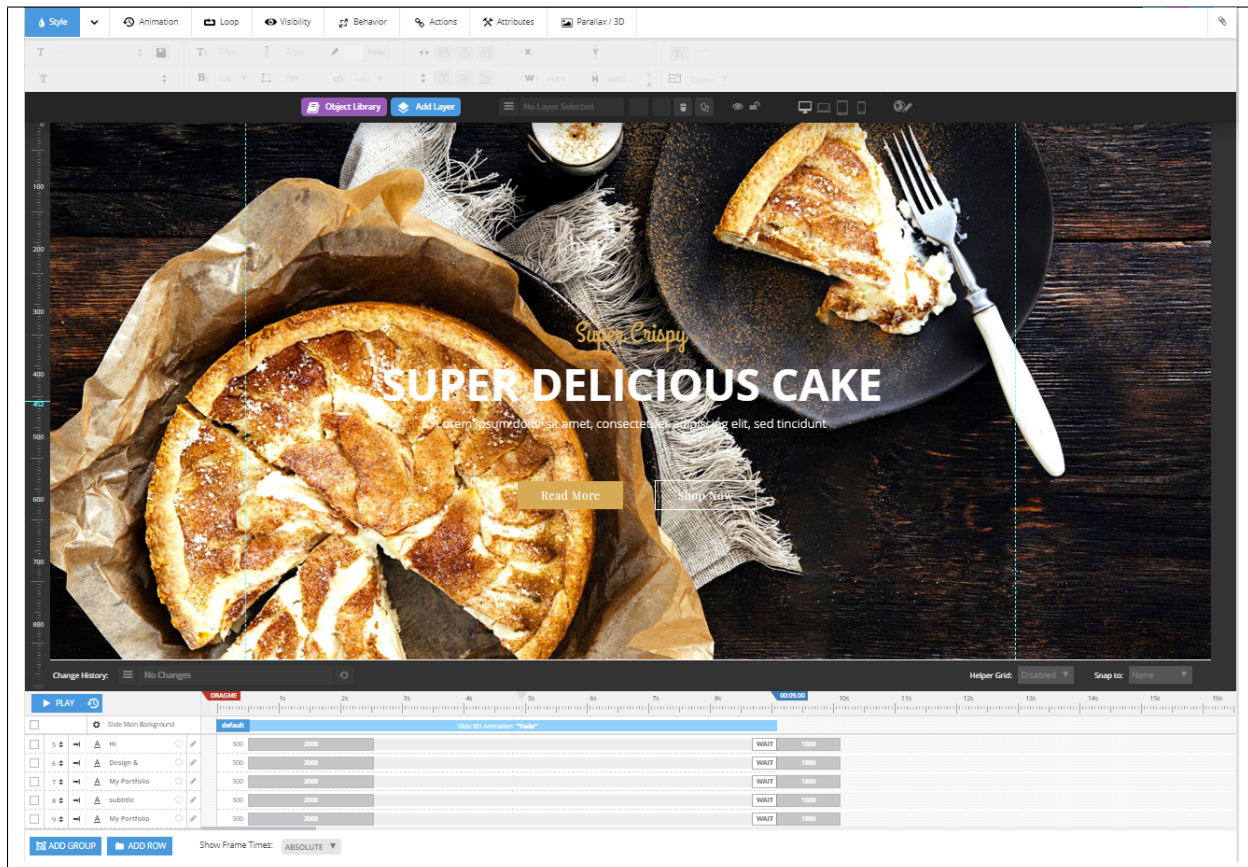

You can see the existing revolution slider at the *Revolution Sliders* area. Choose the revolution slider that you would like to edit.

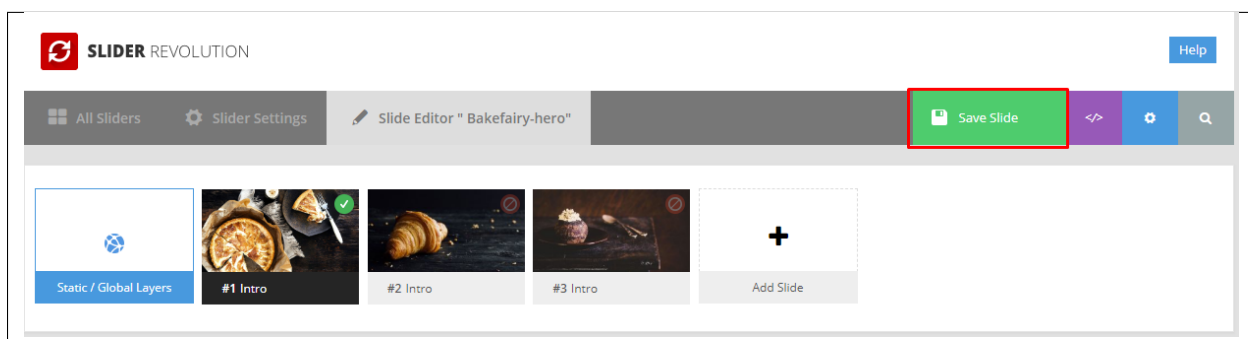

In the Slide Editor, you will see the slides that are created for a revolution slider. Click on the slide you want to edit.

You can edit the text and image content of the revolution slider as you see fit in the editor. For more info on how to use the Revolution Slider, [click here](#).

Once you are satisfied, click the *Save Slide* button at the upper right of the page.

#### 13.1 Widgets

**Widgets** are small blocks of content, which you can find in theme footer or sidebar. They were originally designed to provide a simple and easy-to-use way of giving design and structure control of the WordPress Theme to the user, which is now available on WordPress Themes to include the header, footer, and elsewhere in the WordPress design and structure.

Shop sidebar

### 13.1.1 Sidebars

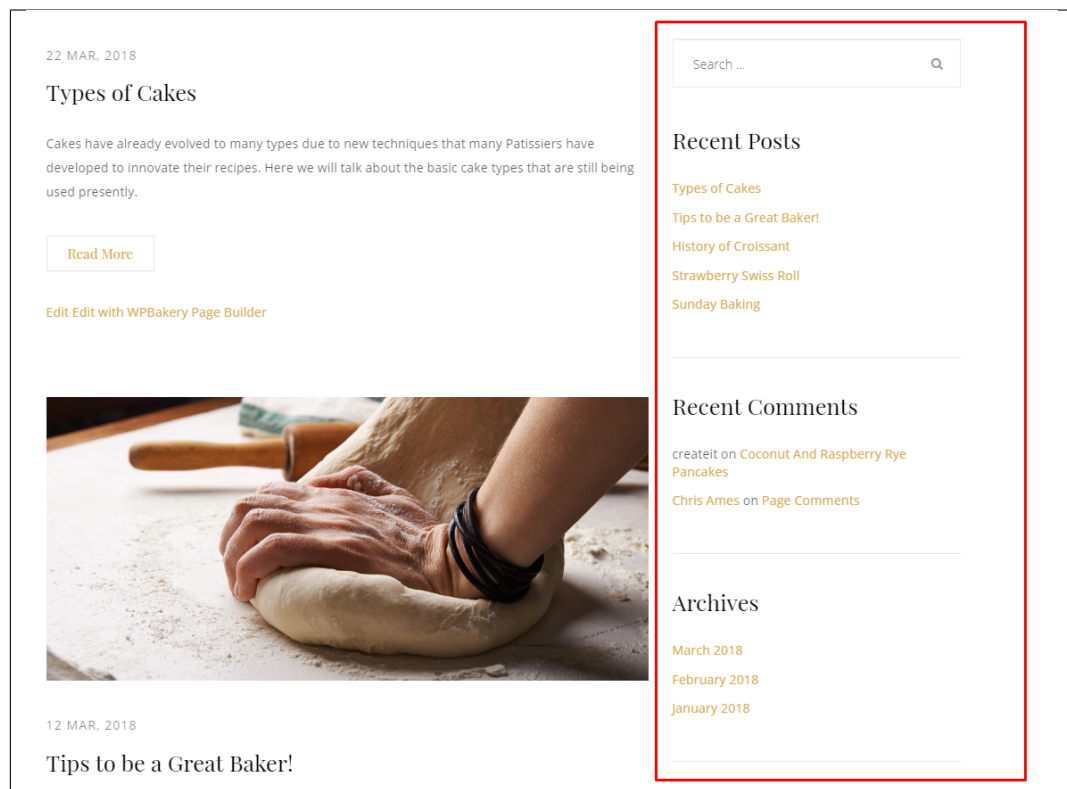

In Bakefairy you have access to 6 sidebars that can be customized using available theme widgets.

- **Footer 1 to 4 column**

You can enable/disable the footer in the *Appearance > Customize > Footer*, then uncheck the *Footer display*.

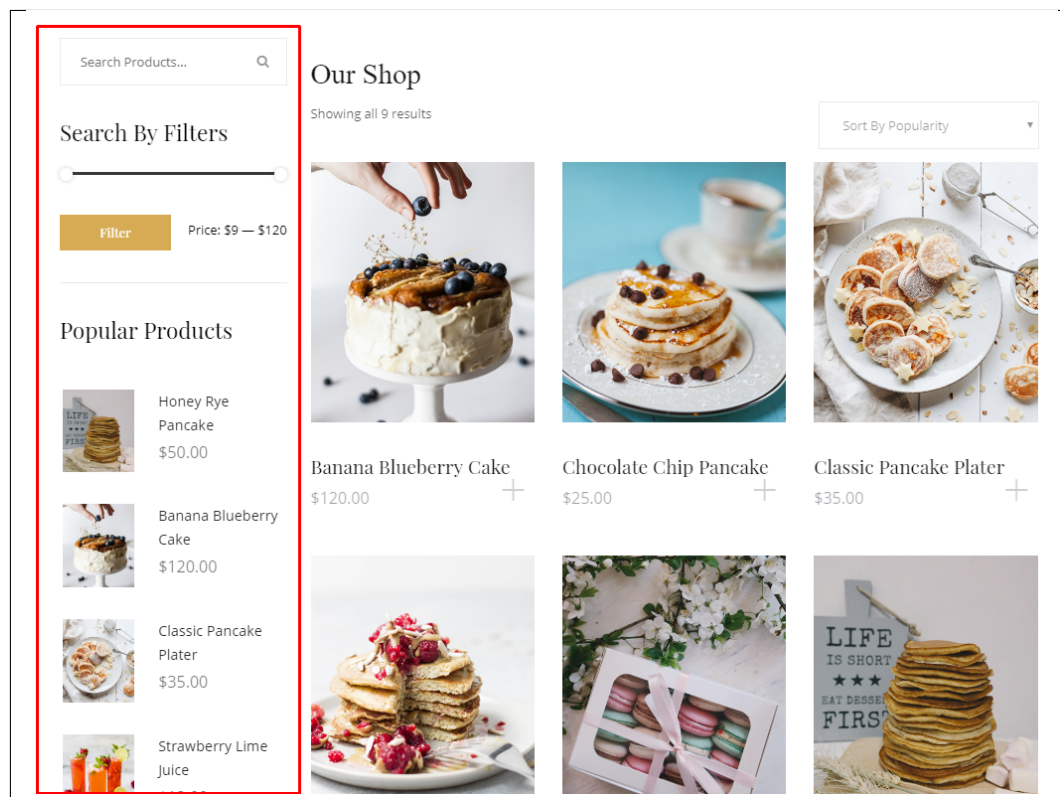

- **Blog sidebar**

You can enable/disable blog sidebar in the *Appearance > Customize > Blog Settings > Blog/Single blog post*, then uncheck the *Display blog sidebar*.

- **Shop Sidebar**

### 13.1.2 How to Edit Widgets

You can access widget edit screen under *Appearance > Widgets* panel or via *Customize* on path *Appearance > Customize > Widgets*. It has three main areas:

- Available Widgets
- Inactive Widgets
- Inactive Sidebars and widget areas

To add a widget to your site, drag and drop the name of the widget you want to use from the *Available Widgets* section into one of the widget areas on the right-hand side of the window. After you have added it, the widget will open up (or if it doesn't, you can click on the triangle to open it) and you can change the settings and save the widget. The specific settings needed will depend on what type of widget you are using. For instance, if it is a text widget, you just need to type in the text (and optionally, HTML code), and save the widget.

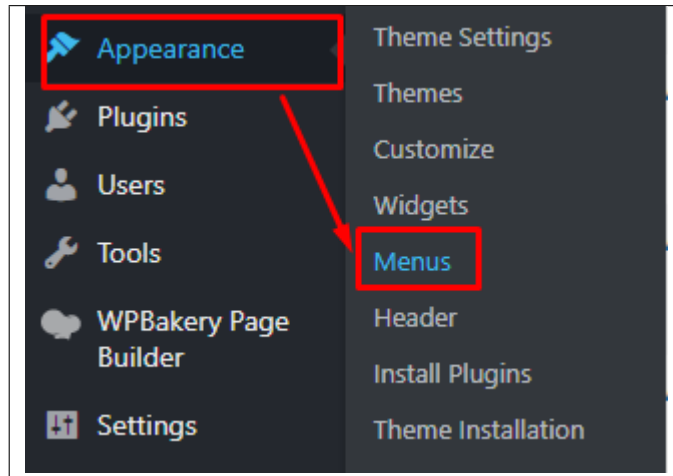

## 13.2 Menus

This guide covers the basic tasks a user may carry out when using the built-in menu editor.

### 13.2.1 Menu Setup

To make a simple menu, follow the steps:

- **Step 1** - Navigate your Dashboard to *Appearance > Menus*. The *Menus* page will show.

- **Step 2** - In the menus page, you can edit a menu or make a new menu. To make a new menu, locate *create a new menu*.

- **Step 3** - You will be asked to name your menu. After naming the menu, click *Create Menu*.
- **Step 4** - From the right side choose pages, links, or categories that you want to add to your menu and click on *Add to Menu*. Once menu items are added, you can reorder or nest them via drag and drop tool. Remember to click Save Menu when you finish to keep your changes saved.

Display location ☐ Top primary menu (Currently set to: sella-menu)

☐ Secondary menu in left sidebar (Currently set to: sidebar-menu)

Delete Menu Save Menu

- **Step 5** - You can set a menu as a *Left primary menu* or *Right primary menu*. Visible on the top of the page.

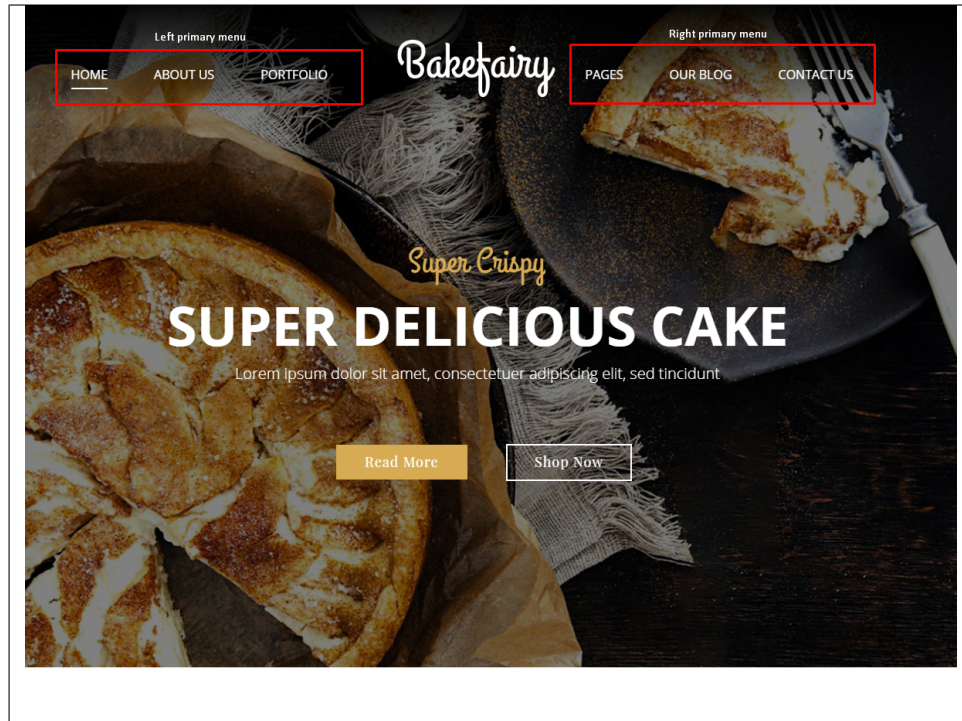

**Menu Settings**

Auto add pages ☐ Automatically add new top-level pages to this menu

Display location ☐ Left primary menu (Currently set to: Main menu Left)

☒ Right primary menu

1. **Left primary menu**
2. **Right primary menu**

- **Step 6** - After any changes, click on *Save Menu* button.

### 13.2.2 Multi-level Menu Setup

When planning the structure of your menu, it helps to think of each menu item as a heading in a formal report document. In a formal report, main section headings (Level 1 headings) are the nearest to the left of the page; sub-section headings (Level 2 headings) are indented slightly further to the right; any other subordinate headings (Level 3, 4, etc) within the same section are indented even further to the right.

The WordPress menu editor allows you to create multi-level menus using a simple 'drag and drop' interface. Drag menu items up or down to change their order of appearance in the menu. Drag menu items left or right in order to create sub-levels within your menu.

To make one menu item a subordinate of another, you need to position the 'child' underneath its 'parent' and then drag it slightly to the right.

- Position the mouse over the 'child' menu item.
- While press and holding the left mouse button, drag it to the right.
- Release the mouse button.
- Repeat these steps for each sub-menu item.
- Click the **Save Menu** button in the *Menu Editor* to save your changes.

## Menu Structure

Drag each item into the order you prefer. Click the arrow on the right of the item to reveal additional configuration options.

## CHAPTER 14

---

### Customising Bakefairy

---

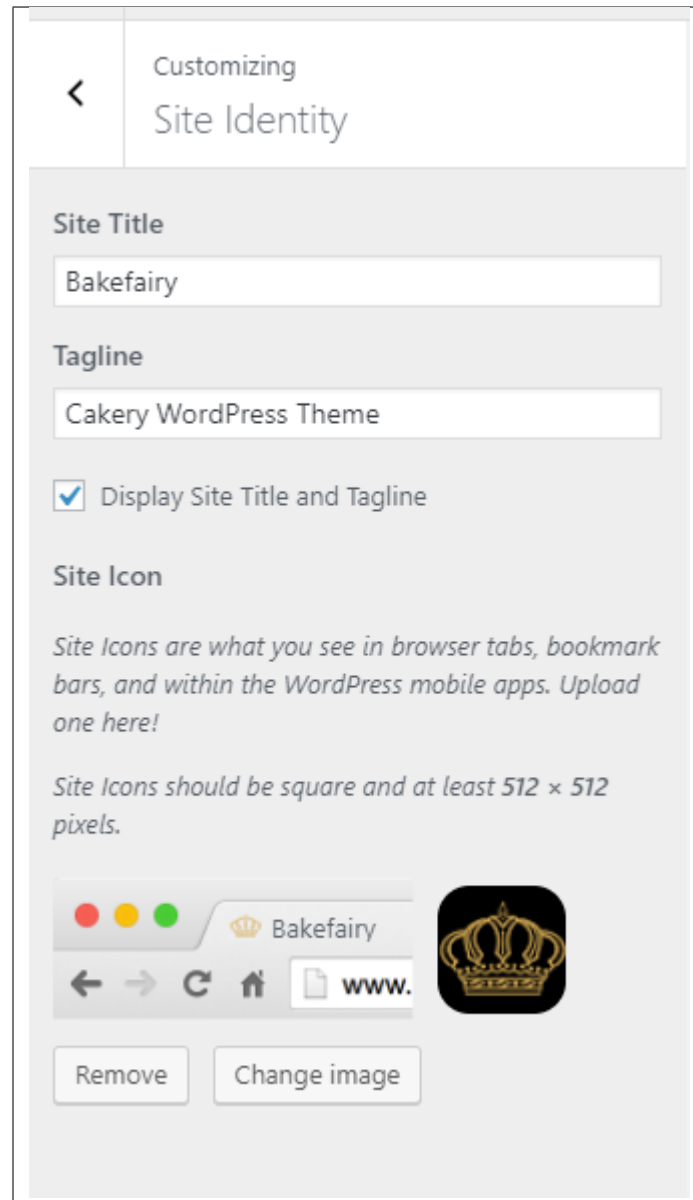

Bakefairy comes with an advanced customizer, which allows to edit most of the theme's elements in one place. If you want to use it, navigate to *Appearance > Customize*.

## 14.1 Site Identity

Here you will have the option to customize your site's identity or how it can be viewed by people.

- **Site Title** - The title of the site you created.
- **Tagline** - The slogan/catchphrase for your site. What people will remember if they see your site.
- **Site Icon** - The icon used as a browser icon. Icons must be square, and at least 512 pixels wide and tall.

Add all the information you like to add, then click on the *Publish* button.

## 14.2 Colors

You can pick the color scheme of the site here.

---

**Note:** In order to use this feature, please have SASS Compiler enabled in Unyson extensions.

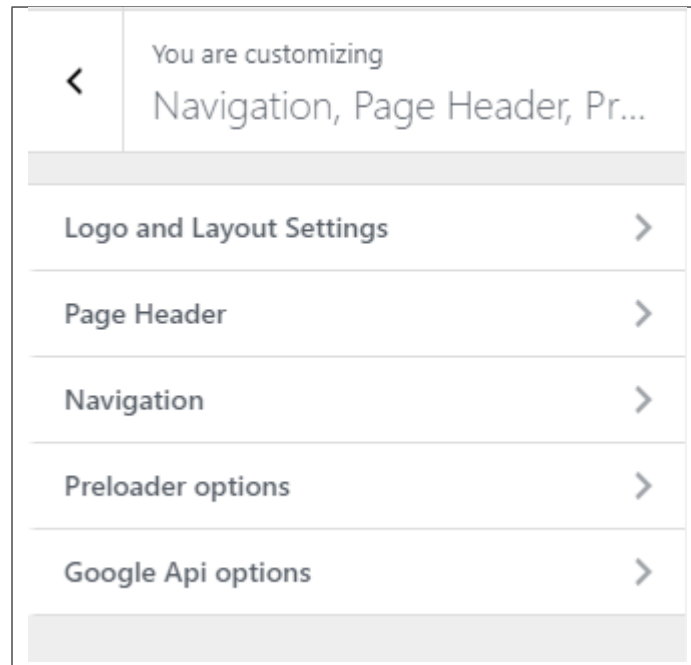

---

- **Pick the motive color** - Pick the main color scheme of the site.

Add all the information you like to add, then click on the *Publish* button.

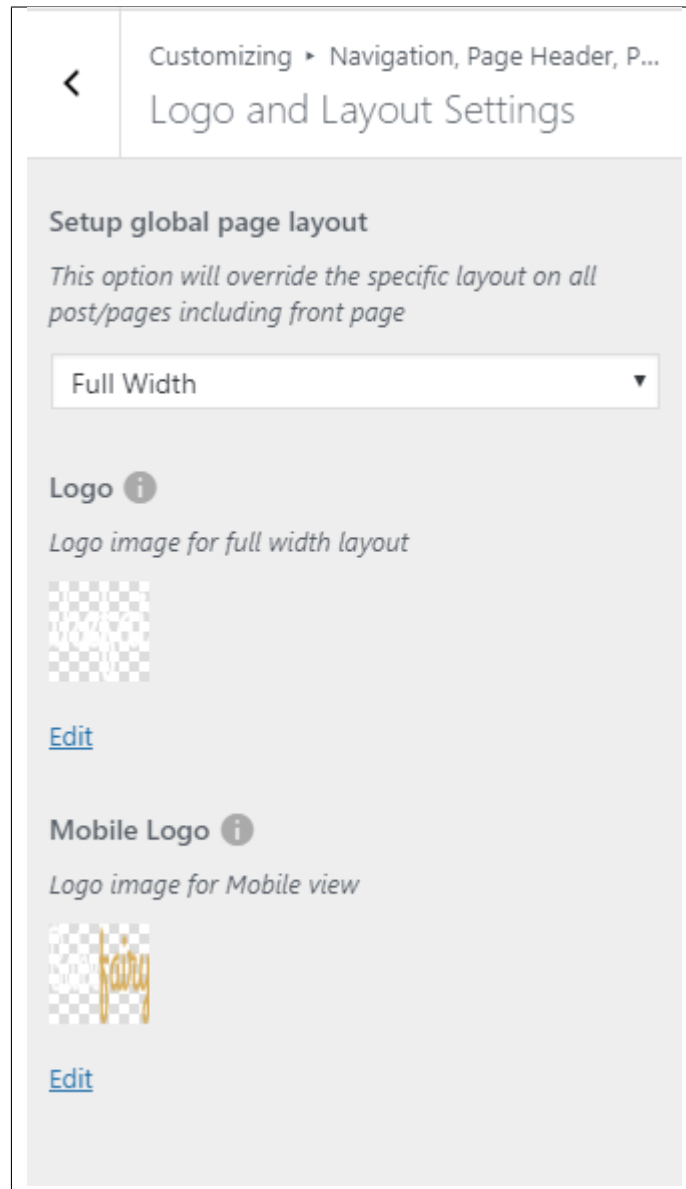

## 14.3 Navigation, Page Header, Preloader

This is divided into 5 parts:

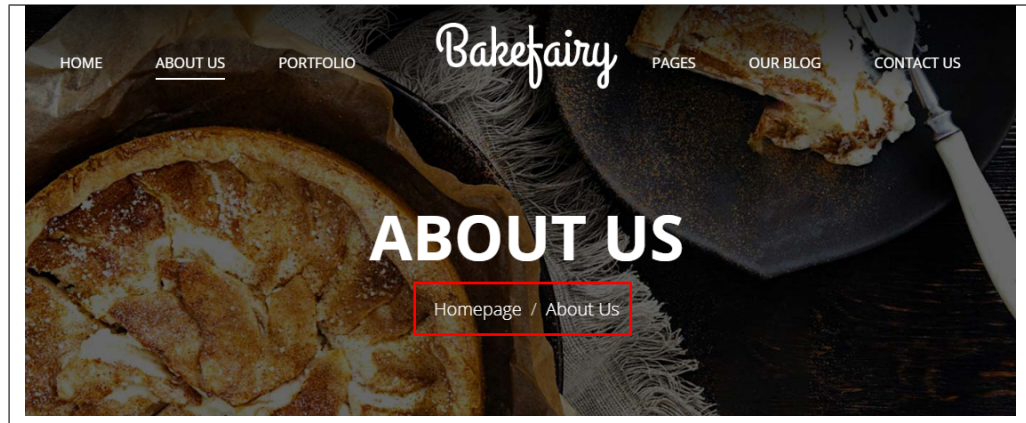

- **Logo and Layout Settings**

- **Setup global page layout** - This option will override the specific layout on all post/pages including front page.
- **Logo** - Logo for the site. It will be shown at the top-center of the site.
- **Mobile Logo** - Logo for the site in mobile view.

- **Page Header**

- **Display page header** - Option to show default header to pages that don't have custom headers.
- **Display breadcrumbs** - Option to show breadcrumbs in the site.

- **Head section type** - Header section's animation type.
- **Mobile background image** - Set an image as the header background in mobile view.
- **Background image** - Set an image as the default header for the site.
- **Second background image** - Set an image as the 2nd header background. This will only show when Head section type is set to *Kenburns*.
- **Third background image** - Set an image as the 3rd header background. This will only show when Head section type is set to *Kenburns*.
- **Head height** - Set the height of the default header.
- **Parallax ratio** - Set the parallax speed. This will only apply when Head section type is set to *Parallax*.
- **Video url** - Set the video url to show in the header.

- **Navigation**

- **Navigation behavior type** - How the navigation area of the site behaves.
- **Navigation theme** - How the navigation area looks.

- **Preloader options**

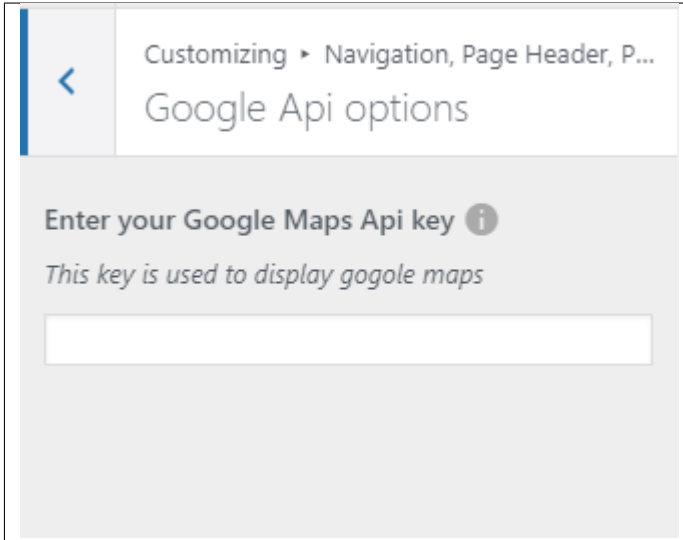

- **Preloader on/off** - Option to show preloader when page in site is loading.
- **Image for preloader** - Set an image as the preloader.

The screenshot shows a mobile app interface for customizing 'Preloader options'. At the top, a breadcrumb trail reads 'Customizing > Navigation, Page Header, P...'. Below this is a back arrow and the title 'Preloader options'. The main content area has a light gray background and contains two sections. The first section is titled 'Preloader on/off' with an information icon. Below the title is the description 'Display preloader before page is loaded' and a checked checkbox labeled 'Yes'. The second section is titled 'Image for preloader' with an information icon. Below the title is the description 'Add image if you want to use different than page logo'. Underneath is a placeholder image showing an eye icon, and at the bottom of this section is a blue link labeled 'Add Image'.

- **Google Api options**

- **Enter your Google Maps Api key** - API key for the google map in the site.

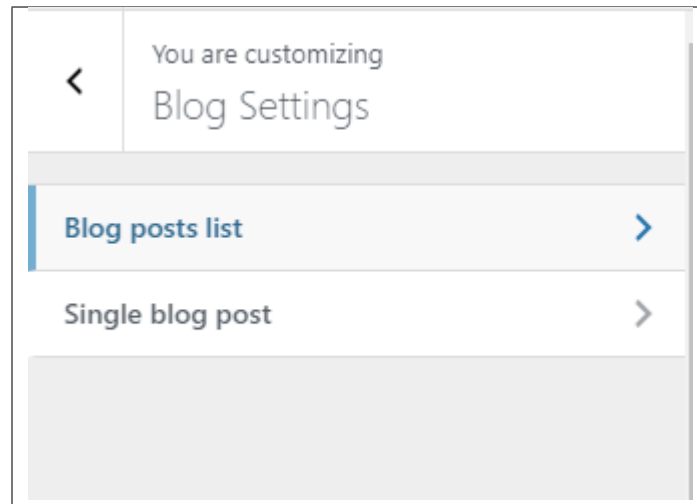

The screenshot shows a mobile app interface for customizing 'Google Api options'. At the top, a breadcrumb trail reads 'Customizing > Navigation, Page Header, P...'. Below this is a back arrow and the title 'Google Api options'. The main content area has a light gray background and contains one section titled 'Enter your Google Maps Api key' with an information icon. Below the title is the description 'This key is used to display google maps'. Underneath is a white text input field.

- **Display shop sidebar** - Option to show sidebar on the products page.
- **Place to display sidebar** - Location on the page where the sidebar is placed.
- **Select width of sidebar** - Select width of shop sidebar.

Add all the information you like to add, then click on the *Publish* button.

## 14.7 Homepage Settings

Option for the front page is shown here.

- **Front page displays** - Options on how the front page/home page looks like.
  - **Your latest posts** - Show the latest post on your blogs.

- **A static page** - Set a page that would stay the same until the page is replaced manually.

Customizing  
Homepage Settings

You can choose what's displayed on the homepage of your site. It can be posts in reverse chronological order (classic blog), or a fixed/static page. To set a static homepage, you first need to create two Pages. One will become the homepage, and the other will be where your posts are displayed.

**Your homepage displays**

☐ Your latest posts

☒ A static page

Add all the information you like to add, then click on the *Publish* button.

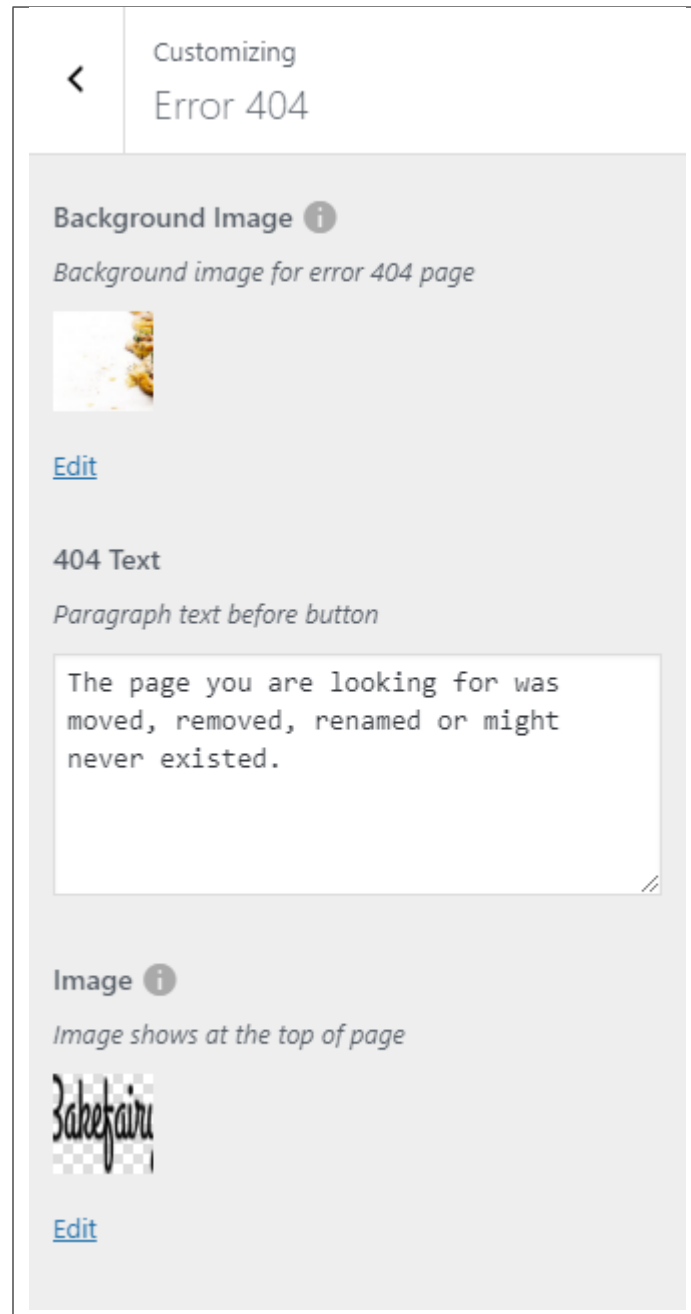

---

**Note:** You can also do this using the **Homepage Setup** instructions in [Page > Homepage Setup](#).

---

## 14.8 Error 404

You can customize the page where error 404 is shown.

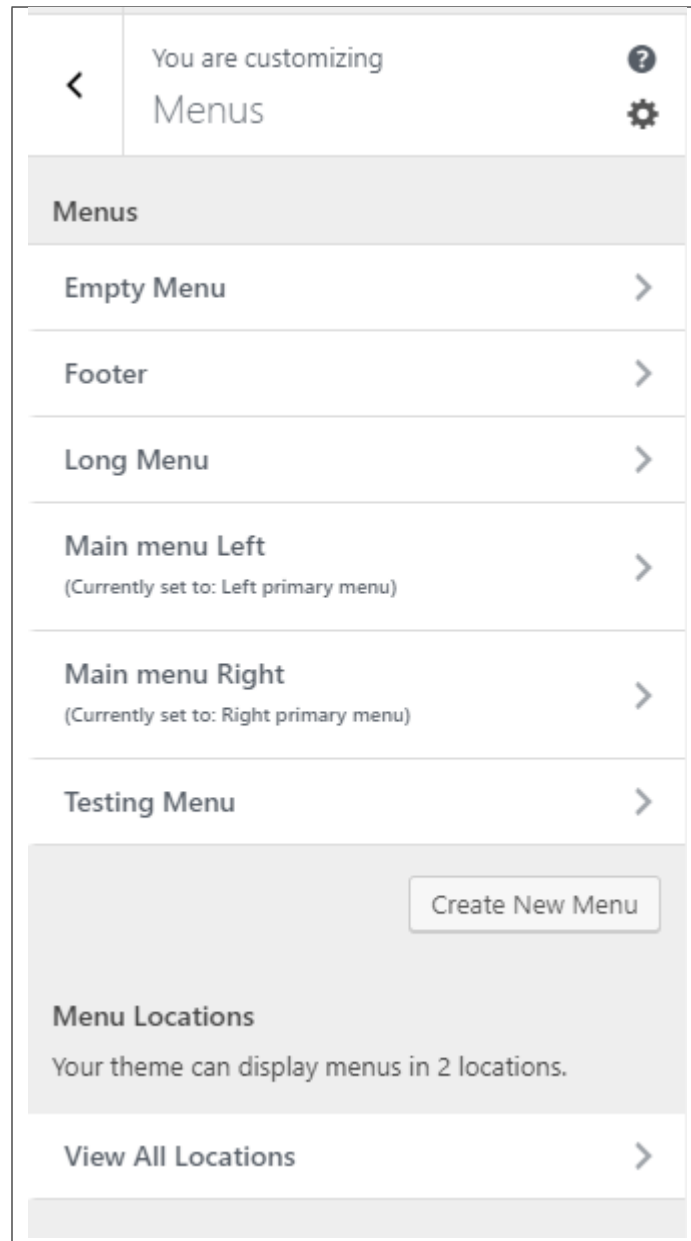

- **Background Image** - Background image for the error 404 page.
- **404 Text** - Text that is shown in the page.
- **Image** - Image that will show on top of the page.

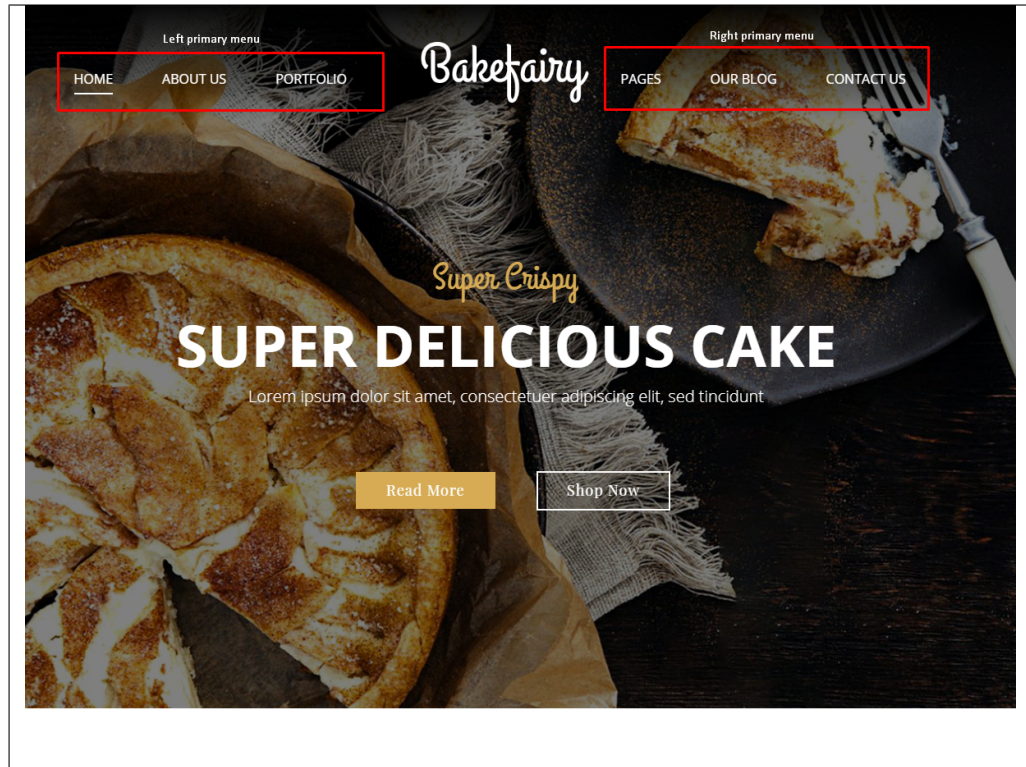

Add all the information you like to add, then click on the *Publish* button.

## 14.9 Menus

You can change the details and settings of a menu here.

1. **Menus** - These are the menus made by you. You can make/add a new menu or delete it here.
2. **Menu Location** - Bakefairy supports 2 menus: *Left primary menu* or *Right primary menu*
  - **Left primary menu** - Choose which menu in the *Menus* would like to use as the Left primary menu.
  - **Right primary menu** - Choose which menu in the *Menus* would like to use as the Right primary menu.

Add all the information you like to add, then click on the *Publish* button.

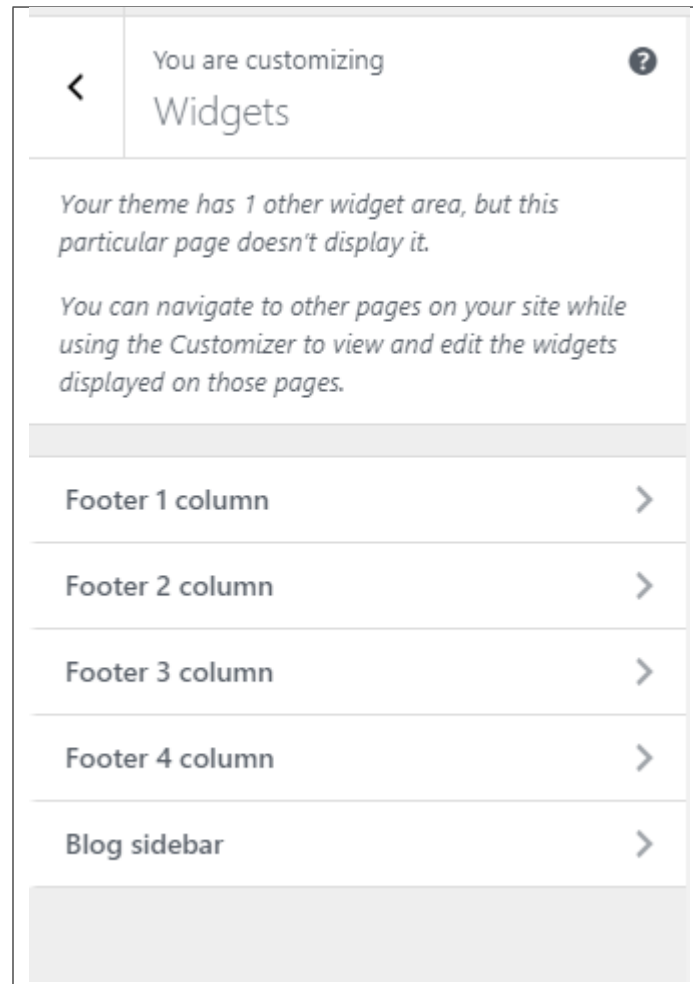

---

**Note:** You can also do the same thing by following Menu Setup instructions in [Widgets & Menu > Menu > Menu Setup](#).

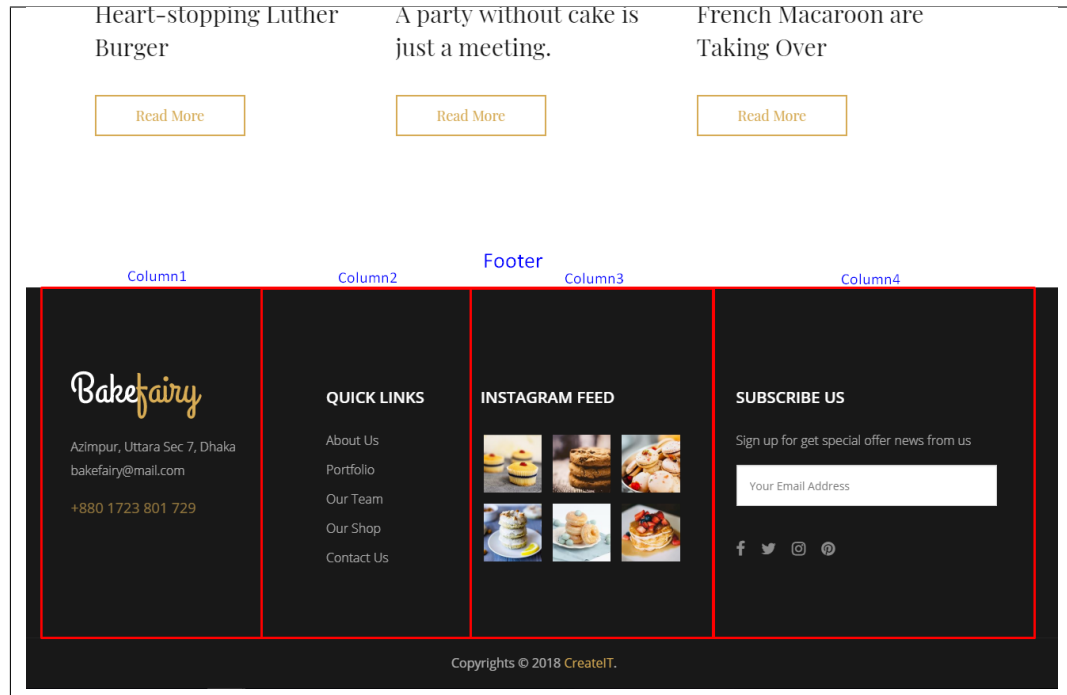

---

## 14.10 Widgets

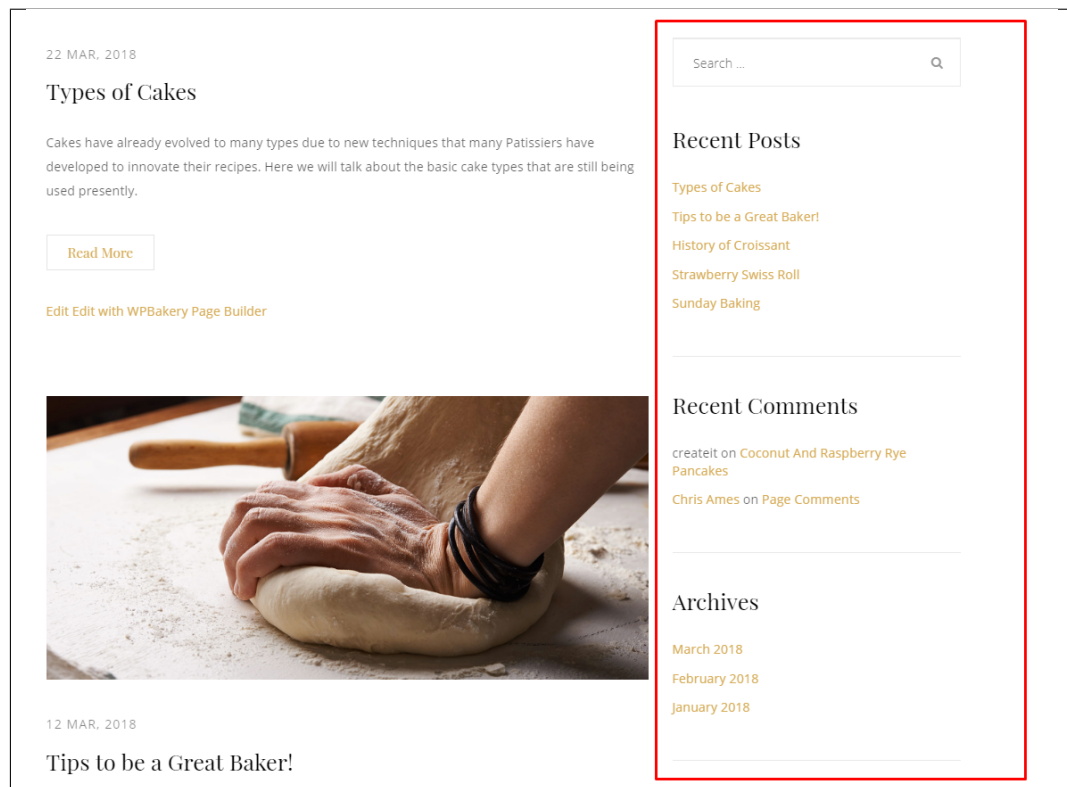

You can customize what is inside the widgets on the page. If a widget is placed on the page you see on the preview, it will be listed on the left side under widgets.

- **Footer 1 column**
- **Footer 2 column**
- **Footer 3 column**
- **Footer 4 column**

## • Blog sidebar

Add all the information you like to add, then click on the *Publish* button.

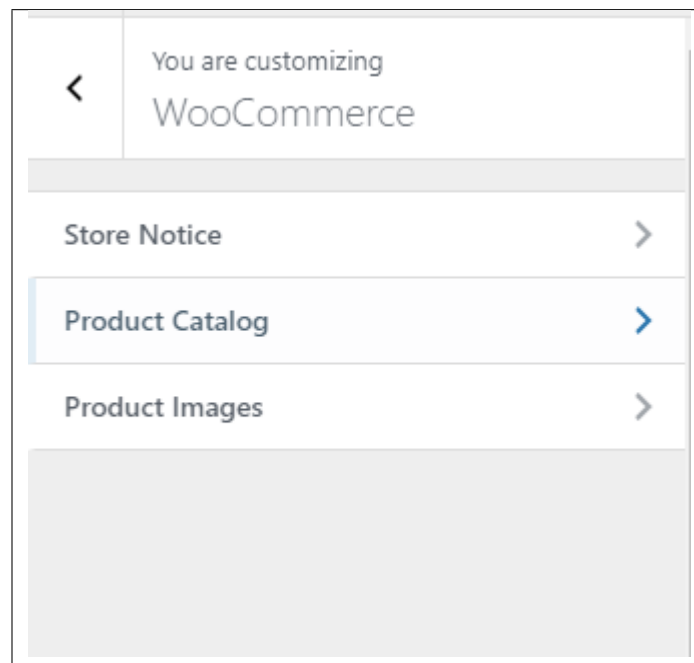

---

**Note:** You can also do the same thing by following [How to Edit Widgets](#) instructions in *Widgets & Menu > Widgets*.

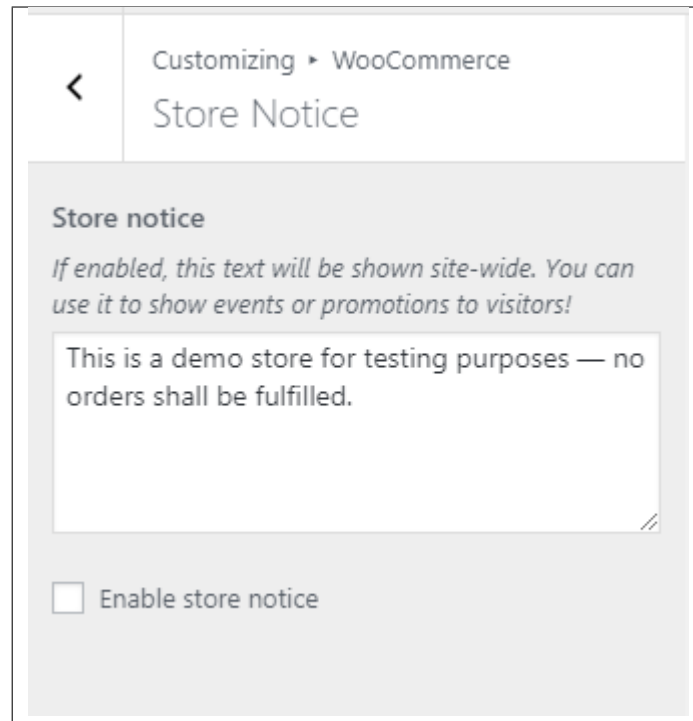

---

## 14.11 WooCommerce

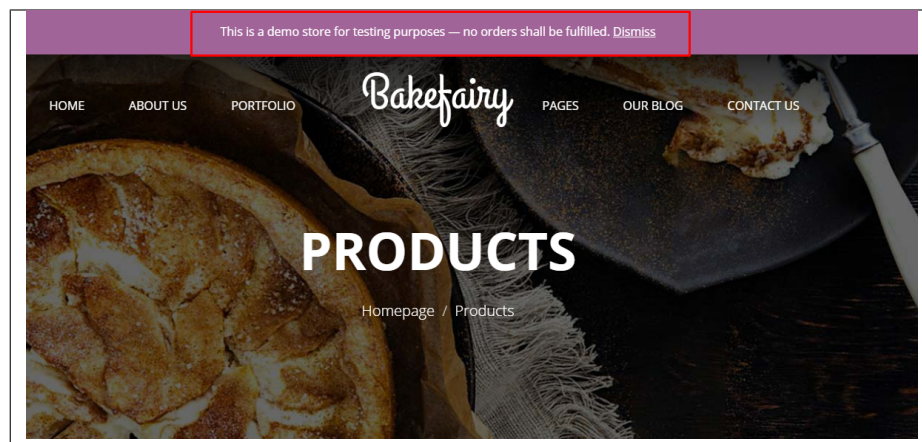

The WooCommerce customizer is divided into 3:

- Store notice

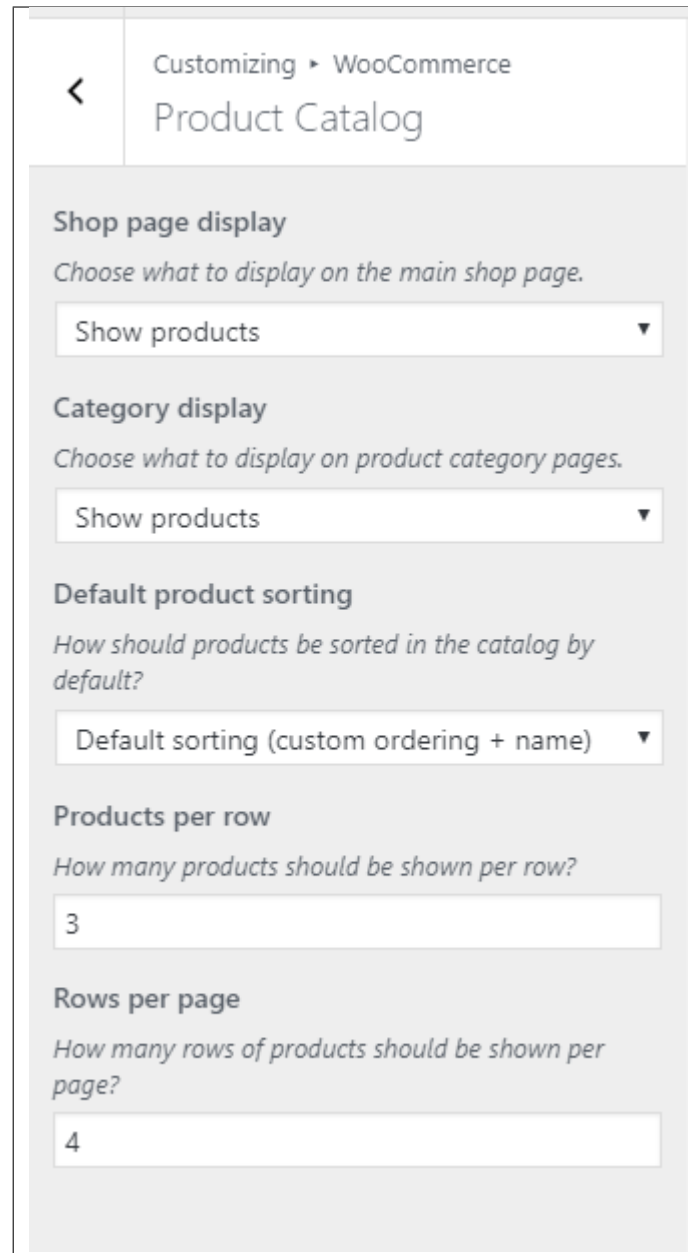

- **Store notice** - Text that is shown at the top most area of the site in a drop-down animation.
- **Enable store notice** - Option to enable the store notice.

- **Product Catalog**

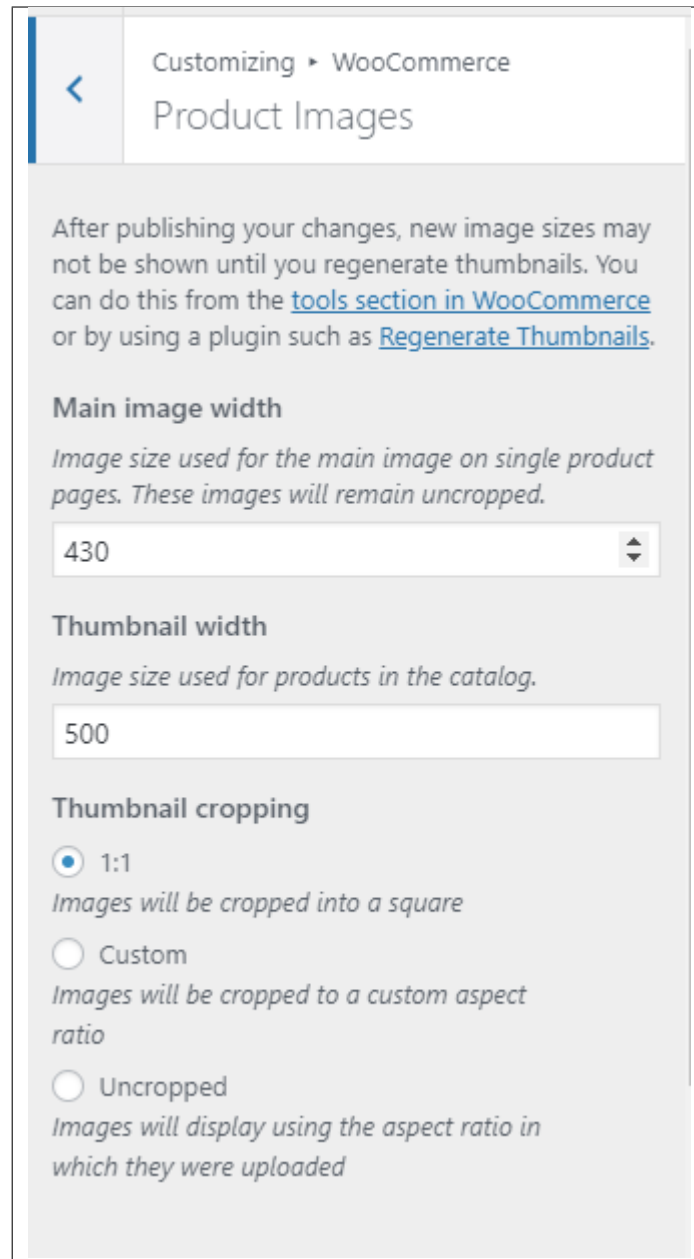

The screenshot shows the 'Customizing > WooCommerce Product Catalog' settings page. It contains five sections, each with a title, a descriptive subtitle, and a form field:

- Shop page display**  
*Choose what to display on the main shop page.*  
A dropdown menu with 'Show products' selected.
- Category display**  
*Choose what to display on product category pages.*  
A dropdown menu with 'Show products' selected.
- Default product sorting**  
*How should products be sorted in the catalog by default?*  
A dropdown menu with 'Default sorting (custom ordering + name)' selected.
- Products per row**  
*How many products should be shown per row?*  
A text input field containing the number '3'.
- Rows per page**  
*How many rows of products should be shown per page?*  
A text input field containing the number '4'.

- **Shop page display** - Choose what to display at the main shop page.
  - **Category display** - Choose what to display at the product category page.
  - **Default product sorting** - How the products are sorted by default.
  - **Products per row** - Number of products in a row. Maximum per row would be 6 products.
  - **Rows per page** - Number of rows per page.
- **Single blog post**

The screenshot shows the 'Customizing > WooCommerce Product Images' settings panel. It includes a back arrow, a breadcrumb trail, and a descriptive paragraph about regenerating thumbnails. Below this are three sections: 'Main image width' with a value of 430, 'Thumbnail width' with a value of 500, and 'Thumbnail cropping' with three radio button options: '1:1' (selected), 'Custom', and 'Uncropped'. Each option has a descriptive line of text below it.

Customizing > WooCommerce  
Product Images

After publishing your changes, new image sizes may not be shown until you regenerate thumbnails. You can do this from the [tools section in WooCommerce](#) or by using a plugin such as [Regenerate Thumbnails](#).

**Main image width**  
*Image size used for the main image on single product pages. These images will remain uncropped.*

430

**Thumbnail width**  
*Image size used for products in the catalog.*

500

**Thumbnail cropping**

☒ 1:1  
*Images will be cropped into a square*

☐ Custom  
*Images will be cropped to a custom aspect ratio*

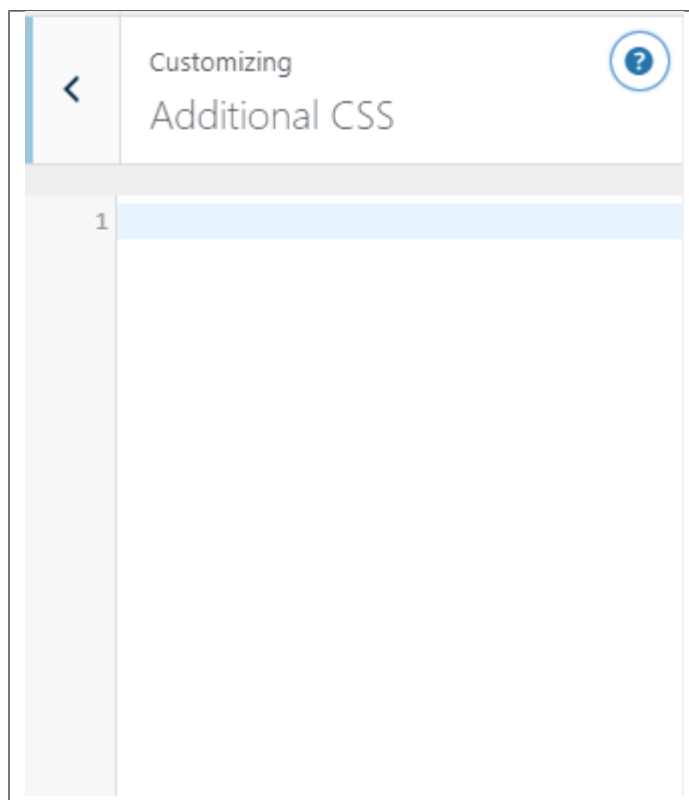

☐ Uncropped  
*Images will display using the aspect ratio in which they were uploaded*

- **Main image width** - Image size used in the single page of the product.
- **Thumbnail width** - Image size used in the products page of the product.
- **Thumbnail cropping**
  - \* **1:1** - Images will be cropped into a square.
  - \* **Custom** - Images will be cropped to a custom aspect ratio.
  - \* **Uncropped** - Images will display using the aspect ratio in which they were uploaded.

Add all the information you like to add, then click on the *Publish* button.

## 14.12 Additional CSS

You can add your own CSS code for your site.

Add all the information you like to add, then click on the *Publish* button.
